<sup>1</sup> Does not include information on Nursing care beds.

<sup>2</sup> Independent refers to both private and voluntary providers.

<sup>3</sup> Residential places in Nursing homes have been included to illustrate the total residential provision in NI. As a consequence residential beds in nursing homes have been excluded from Table 1.19 to avoid double counting. The number of residential homes listed refers to premises who solely provide residential care, therefore the homes to which 'Residential places in Nursing homes' refer are identified as Dual registered homes in Table 1.19.

<sup>1</sup> Bank staff and staff with a whole-time equivalent of less than or equal to 0.03 are excluded from all staff categories. Their input to the service is difficult to measure due to the part-time and variable nature of their work. Bank staff are staff that enable Trusts to maintain service delivery by covering for staffing shortfalls and fluctuating workloads.

<sup>2</sup> Generic - This group encompasses multi-disciplinary staff codes and holding codes for staff whose Agenda for Change code has not yet been assigned within HRMS.

## ***Appendix 2: Programmes of Care***

**The term 'Programme of Care' has been abbreviated in the report to POC.** Programmes of Care are divisions of health care, into which activity and finance data are assigned, so as to provide a common management framework. They are used to plan and monitor the health service, by allowing performance to be measured, targets set and services managed on a comparative basis. In total, there are nine Programmes of Care. However, only those referred to in this publication are shown below and the definition is restricted to cover just community activity.

### **Elderly Care (POC 4)**

This programme covers all activity, and resources used, by any health professional, including all community contacts with those aged 65 and over except where the reason for the contact was because of mental illness or learning disability. All community contacts where the reason for the contact was dementia should also be included, regardless of the patient's age. However, Down's Syndrome patients who develop dementia should remain in the Learning Disability Programme of Care for any dementia related care or treatment. All physically and/or sensorily disabled patients aged 65 and over should be included as well as all work relating to homes for the elderly, including those for the Elderly Mentally Infirm. Age alone is not the determining factor in allocating patients and clients to the Elderly Care Programme of Care - community contacts are allocated by the primary reason for the contact which could result in a person aged 65 or over being allocated to the Mental Health Programme of Care if the reason for the contact was because of mental illness.

### **Mental Health (POC 5)**

This programme covers all activity, and resources used, by any health professional, including all community contacts where the primary reason for the contact was due to mental health. If the reason for contact is that the patient has dementia, the activity should be allocated to the Elderly Care Programme of Care. However, Down's Syndrome patients who develop dementia should remain in the Learning Disability Programme of Care. All work and resources relating to residential accommodation for the Elderly Mentally Infirm should be excluded. This is included in the Elderly Care programme.

### **Learning Disability (POC 6)**

This programme covers all activity, and resources used, by any health professional, including all community contacts where the primary reason for the contact was learning disability, regardless of age. All community contacts with Down's Syndrome patients who develop dementia, for any dementia related care or treatment should be included. All contacts in learning disability homes and units should also be included.

### **Physical and Sensory Disability (POC 7)**

This programme includes all community contacts by any health professional where the primary reason for the contact is physical and/or sensory disability. All patients and clients aged 65 and over are excluded. These contacts should be allocated to the Elderly Care programme.

### **Primary Health and Adult Community (POC 9)**

This programme includes all work, except screening, carried out by General Medical Practitioners, General Dental Practitioners, General Ophthalmic Practitioners and Pharmacists. It includes contacts by any health professional with community patients aged between 16 and 64, for whom the primary reason for the contact is other than mental illness, learning disability or physical and sensory disability.

## ***Appendix 3: Definition of Terms***

### **Average Available and Occupied Places**

Average availability and occupancy should be calculated by Trusts from data collected on a daily basis. However, when this is not possible averages are calculated using weekly or monthly data and dividing by 52 or 12 respectively.

### **Care Packages**

These are the main forms of care recommended through care management, which include the functions of assessing need, care planning, co-ordinating and reviewing services.

### **Face-to-Face Contact**

A contact which is made by one or more health professionals with a patient or client. The contact occurs when the patient/client attends a clinic or a domiciliary visit is made to see the patient/client. The data in the tables refer to the number of people who had at least one face-to-face contact during the year and not the actual number of contacts made.

### **Nursing Home**

A nursing home is a facility staffed by nurses 24 hours per day, which provides services for clients/patients requiring residential nursing care. Medical care continues to be the responsibility of the client/patient's GP. The premises must be owned, managed or leased by the HPSS or a health care contract must exist between the HPSS and the owners of the premises for the provision of care.

### **Residential Care Home**

This is residential accommodation, staffed 24 hours a day, providing board and general care to residents. Such premises are provided for vulnerable persons (e.g. children, the elderly, the physically disabled and those mentally ill or with a learning disability) who require care and supervision in the circumstances where nursing care would normally be inappropriate. The premises must be owned, managed or leased by the HPSS or a health care contract must exist between the HPSS and the owners of the premises for the provision of care.

### **Residential Accommodation**

**Statutory** - any home provided by the Health and Social Care Board or Health and Social Care Trusts under the provisions of the Health and Personal Social Services (Quality, Improvement and Regulation) (NI) Order 2003.

**Voluntary** - any home, registered as a home for persons in need, in accordance with the Health and Personal Social Services (Quality, Improvement and Regulation) (NI) Order 2003. Voluntary organisation means any association carrying on or proposing to carry on activities otherwise than for the purpose of gain by the Association or by individuals thereof.

**Private** - refers to a home registered as a home for persons in need in accordance with the Health and Personal Social Services (Quality, Improvement and Regulation) (NI) Order 2003.

**Dual Registered** – refers to homes registered to provide both residential and nursing care.

## **Client Groups**

**Elderly** - refers to persons who are aged 65 years or more and who are not included in any of the other client groups.

**Physically/Sensorily Disabled** - refers to persons who are substantially and permanently disabled by illness, or otherwise, including the chronically sick. This group will include the following groups: blind, partially sighted, deaf with speech, deaf without speech, hard of hearing and general classes (i.e. those whose primary handicap is neither visual nor auditory).

**Blind and Partially Sighted** - refers to persons who are either registered or registerable as blind or partially sighted.

**Designated Mentally Ill** - refers to persons who in the professional opinion of a doctor - GP or Psychiatrist - are suffering from a mental or psychiatric illness. Mental illness means a state of mind which affects a person's thinking, perceiving, emotion or judgement to the extent that he/she requires care or medical treatment in his/her own interests or in the interests of other people.

**Learning Disabled** - refers to persons who have a state of arrested or incomplete development of mind which includes significant impairment of intelligence and social functioning. To be included in this group a person must be on the Board's register of learning disabled people.

**Without Material Handicap** - refers to those people, without a physical or mental impairment or learning disability, who have not been included in other client groups.

## **Day Care Facilities**

**Adult Training/Social Education Centres** - These are establishments mainly for people over 16 years of age with a learning disability in which social and occupational training is provided with the object of preparing those, who have the ability, to progress into workshops.

**Day Centres** - These are centres which have a full time organiser and where professional staff are employed. They are open five or more days each week and provide a variety of activities for members and facilities for meals, bathing, hairdressing, chiropody etc.

**Workshops** - This is where industrial therapy and contract work is undertaken, aimed at preparing those who are suitable for placement in open or sheltered employment in the community.

## ***Appendix 4: Explanatory Notes***

**Source:** The data contained in this publication, unless otherwise stated, have been compiled from the quarterly/annual Korner Aggregate Returns (KARs) which were introduced from 1 April 1988. The data relate to activity occurring in the fields of community health and personal social services. The cut-off point for amendments to tables was 28th August 2009 and any amendments notified by Providers after this date will not have been included.

**Programmes of Care (POCs):** In line with the publications policy of Community Information Branch (CIB), this bulletin has been structured on a POC basis. This should facilitate analysis by individuals with an interest in specific POCs. However, an overall NI summary section has also been included for those requiring an overall view of activity.

A number of tables in the 'NI Summary' section are not replicated for individual POC sections, either because the activity contained in the table is not relevant to a particular POC or because it is not possible for the table to be broken down to individual POC level. Conversely, in some cases tables are presented for individual POCs which are relevant only within those POCs.

A number of tables have been broken down by age group and a 'Not Known' category may have been included on such tables. However, as age can be a determining factor when apportioning activity to individual POCs, it has been necessary to apportion activity where the age is not known to the POC that accounts for the greatest proportion of that activity.

**Healthcare Providers:** This bulletin presents data broken down by Providers where that particular Provider had a community service (see Appendix 1 for a complete list of Providers which had a community service in 2008/2009). It is important to note that in a minority of cases the service may have taken place in a hospital setting. When comparing data at Provider level with earlier years it is important to note that due to a reorganisation of facilities within some Providers the comparison may not be on a like with like basis.

**Data Quality:** Only data deemed to be of sufficient quality have been published in this bulletin. A number of other specific activity areas (e.g. Allied Health Professions) have been omitted due to the incomplete nature and/or poor data quality of the relevant central returns. In consequence, there is no specific section included in relation to community activity in POC 2 (Maternity and Child Health). These problem areas are being considered in an ongoing review of data quality within Community Information Branch.

**Data Availability/Format:** A number of the tables contained in the bulletin are also available on a quarterly basis. In addition, data can be supplied in spreadsheet format (Microsoft Excel) in order to aid secondary analysis.
