Foreword

As Minister for Health I am determined to protect and improve the quality of health and social care services and ensure that these are safe, effective and focussed on the patient. Driving up the quality of services and outcomes for people will be my underlying priority. I am committed to working, not only to improve health but to tackle inequalities in health.

I am particularly pleased, therefore, to launch the Learning Disability Service Framework for consultation. This Framework aims to improve the health and wellbeing of people with a learning disability, their carers and families, by promoting social inclusion, reducing inequalities in health and social wellbeing and improving the quality of health and social care services, especially supporting those most vulnerable in our society.

Service Frameworks aim to set out clear standards of health and social care that are both evidence based and measurable. They set out the standard of care that service users and their carers can expect, and are also to be used by health and social care organisations to drive performance improvement through the commissioning process. The Learning Disability Service Framework is one of five Frameworks that have been developed to date and that focus on the most significant causes of ill health and disability in Northern Ireland, namely: cardiovascular disease, respiratory disease, cancer, mental health and learning disability. Two further Frameworks, for children and young people and older people are currently under development.

This latest Framework has been developed actively involving a wide range of people across all aspects of health and social care including, patients, clients and carers, all of whose support has been invaluable. I would like to convey my sincere thanks, to you all, for your immensely important contribution.

I would encourage everyone with an interest in learning disability to respond to this consultation exercise and I look forward to hearing what you have to say about the work we have done so far before we finalise this Framework for implementation next year.

Edwin Poots MLA
Minister for Health, Social Services and Public Safety

LEARNING DISABILITY SERVICE FRAMEWORK

Summary of Standards

Communication and Involvement in the Planning and Delivery of Services

STANDARD	KEY PERFORMANCE INDICATORS	ANTICIPATED PERFORMANCE LEVEL
Standard 1: People with a learning disability should be involved as a matter of course in making choices or decisions about their individual health and social care needs. The views of their family, carers and advocates should be taken into account in the planning and delivery of services, unless there are explicit and valid reasons to the contrary agreed with the person.	1. Evidence that people with a learning disability their family and carers have been involved in making choices or decisions about their individual health and social care needs.	Establish baseline Performance levels to be determined once baseline established.
Standard 2: (Generic) People with a learning disability, their family and carers should have opportunities to engage actively and meaningfully with health and social care organisations at all levels.	1. HSC organisations that care for and support people with a learning disability have organisational strategies and/or policies for person and public involvement. 2. Evidence that people with a learning disability their family and carers have been involved in the planning and delivery of services.	All HSC organisations All HSC organisations

STANDARD	KEY PERFORMANCE INDICATORS	ANTICIPATED PERFORMANCE LEVEL
<p>Standard 3:</p> <p>People with a learning disability should be helped by HSC professionals to develop their capacity to give or refuse informed consent.</p>	<ol style="list-style-type: none"> 1. Organisations that care for and support people with a learning disability have organisational strategies and/or policies for person and public involvement. 2. Evidence that robust processes are in place where capacity has been judged to be an issue within HSC services or services commissioned by HSC. 	<p>All HSC organisations</p> <p>Develop and implement SAAT</p> <p>Performance levels to be determined based on outcomes of SAAT.</p>
<p>Standard 4: (Generic)</p> <p>People with a learning disability should expect effective communication with them by HSC organisations as an essential and universal component of the planning and delivery of health and social care.</p>	<ol style="list-style-type: none"> 1. HSC organisational communication strategies that show evidence of direct user/family carer feedback as part of regular audit of their effectiveness. 2. HSC organisational complaints reports should show evidence of action where communication is the primary factor. 3. HSC organisational strategies for clinical and social care governance should show evidence that direct patient feedback is included in relevant audit and monitoring. 4. Develop and agree a regional training plan for staff in both HSC and services commissioned by HSC to raise awareness of communication difficulties and how they may be addressed. 5. Percentage of people with a learning disability who do not use speech as their main form of communication who have been supported to establish a functional communication system. 	<p>All HSC organisations</p> <p>All HSC organisations</p> <p>All HSC organisations</p> <p>Regional Training Plan in place.</p> <p>Training is delivered in accordance with Regional Training Plan.</p> <p>Develop and implement SAAT</p> <p>Performance levels to be determined based on outcomes of SAAT.</p>

STANDARD	KEY PERFORMANCE INDICATORS	ANTICIPATED PERFORMANCE LEVEL
<p>Standard 5:</p> <p>People with a learning disability should receive information about services and issues that affect their health and social wellbeing in a way that is meaningful to them and their family.</p>	<ol style="list-style-type: none"> 1. All HSC organisations should provide evidence that they are making information accessible to people with a learning disability. 2. Each person with a learning disability can access a named person who can signpost them to relevant services. 	<p>Development and implementation of SAAT.</p> <p>Performance levels to be determined once baseline established.</p> <p>Establish baseline of information provided</p> <p>Performance levels to be determined once baseline established.</p>
<p>Standard 6:</p> <p>People with a learning disability, or their carer, should be able to access self directed support in order to give them more control and choice over the type of care and support they receive.</p>	<ol style="list-style-type: none"> 1 Evidence of provision of accessible information on Direct Payments within HSC organisations. 2 Percentage of requests for Direct Payments from people with a learning disability that were approved. 3 Number of adults with a learning disability in receipt of Direct Payments expressed as a percentage of those in contact with Trust (regional percentage is 2.25%). 4 Number of children with a learning disability in receipt of Direct Payments expressed as a percentage of those in contact with Trust (regional percentage is 3.50%). 5 The HSC Board and Trusts have plans in place to extend the range and scope of self directed support including how they will develop skills and expertise in relevant staff. 	<p>Develop and implement SAAT.</p> <p>Establish performance levels based on outcomes from SAAT.</p> <p>Develop and implement SAAT.</p> <p>Establish performance levels based on outcomes from SAAT.</p> <p>Performance levels to be determined based on available resources and included in final Framework</p> <p>Performance levels to be determined based on available resources and included in final Framework</p> <p>HSC Board and all Trusts.</p>

STANDARD	KEY PERFORMANCE INDICATORS	ANTICIPATED PERFORMANCE LEVEL
Standard 7: People with a learning disability using learning disability services have access to advocacy services in both community and hospital settings.	1. Percentage of services for people with a learning disability commissioned or provided by HSC that comply with DHSSPS guidelines on advocacy.	Establish baseline Performance levels to be determined once baseline established.

Children and Young People

Standard 8: From the point at which concerns are raised that a child or young person may have a learning disability, there is an action plan in place to determine the nature and impact of the learning disability	1. Percentage of parents who express satisfaction with the assessment process and how the outcomes were conveyed.	Establish baseline of information provided. Performance levels to be determined once baseline established.
Standard 9: Children and young people should receive child-centred and co-ordinated services through assessment to ongoing care and support from the point at which a determination has been made that they have a learning disability.	1. Percentage of children and young people with a learning disability and carers who have been offered an assessment either under the Family Health Needs Assessment or UNOCINI Assessments. 2. Percentage of children and young people who have an agreed support plan detailing a pathway to receiving appropriate care and support.	Establish baseline Performance levels to be determined once baseline established Establish baseline Performance levels to be determined once baseline established

STANDARD	KEY PERFORMANCE INDICATORS	ANTICIPATED PERFORMANCE LEVEL
<p>Standard 10:</p> <p>HSC services should respond to the needs of children and young people who have a learning disability and complex physical health needs in a manner that is personalised, developmentally appropriate and which support access to appropriate care.</p>	<ol style="list-style-type: none"> 1 Percentage of parents whose child has a learning disability and complex physical health needs who have, and can name their, key worker with co-ordinating responsibility. 2 Percentage of children and young people with complex physical health needs who have effective transition arrangements in place between hospital and community. 3 Percentage of children with a learning disability and complex physical health needs who have received a multi-professional assessment using the regional universal assessment tool. 4 Percentage of children and young people with a learning disability and complex physical health needs who are receiving care under the integrated care pathway. 	<p>Scope requirements and produce audit plan.</p> <p>Audit 50% of information available.</p> <p>100%.</p> <p>Establish baseline</p> <p>Performance level to be established when baseline is established.</p> <p>Fast Trace arrangements for access to hospital/community services to be audited following establishment of baseline.</p> <p>90%</p> <p>95%</p> <p>98%</p> <p>Establish baseline</p> <p>Performance levels to be determined once baseline established</p>

STANDARD	KEY PERFORMANCE INDICATORS	ANTICIPATED PERFORMANCE LEVEL
Standard 11: Any child or young person who cannot live at home permanently should have their needs addressed in a way that takes full account of their learning disability.	1 Percentage of looked after children or young people with a learning disability who cannot live with their families who have a Permanency Plan. 2 Percentage of looked after children or young people with a learning disability who cannot live at home, who have access to specialised placements where the need for this is indicated in the Permanency Plan.	Establish baseline Performance levels to be determined once baseline established Establish baseline Performance levels to be determined once baseline established

Entering Adulthood

Standard 12: Young people with a learning disability should have a transition plan in place before their 15 th birthday and arrangements made for their transition to adulthood by their 18 th birthday.	1. Percentage of 15 year olds with a learning disability who have a written plan in place that they and their families have contributed to. 2. Percentage of young people who express satisfaction that their transition plan has been implemented within 2 years of leaving school. 3. Evidence of transfer to DES for health checks for children on transition to adult services.	Develop and implement SAAT Performance levels to be determined based on SAAT outcomes Develop and implement SAAT Performance levels to be determined based on SAAT outcomes 90% 95% 98%.

STANDARD	KEY PERFORMANCE INDICATORS	ANTICIPATED PERFORMANCE LEVEL
Standard 13: Men and women with a learning disability should be supported to have meaningful relationships, which may include marriage and individual, unique, sexual expression within the law, balancing their rights with responsibilities.	<ol style="list-style-type: none"> 1. Regional guidelines on sexuality and personal relationships are developed to ensure a consistent approach. 2. Trusts to facilitate appropriate training for staff. 3. Trusts to facilitate appropriate training for service users and family carers. 	HSC Board policy developed and agreed. 40% 80% Level to be established pending development of regional policy.

Inclusion in Community Life

Standard 14: Adults with a learning disability should be able to access support in order that they can achieve and maintain employment opportunities in productive work.	<ol style="list-style-type: none"> 1. Percentage of school leavers with a learning disability who access work placements or employment within one year of leaving school (as percentage of total learning disabled school leaving population). 2. Percentage of adults with a learning disability who receive HSC support to help them secure employment (as a measure of those who request support). 	Establish baseline. Performance levels to be determined once baseline established Establish baseline. Performance levels to be determined once baseline established
--	---	--

STANDARD	KEY PERFORMANCE INDICATORS	ANTICIPATED PERFORMANCE LEVEL
<p>Standard 15:</p> <p>All adults with a severe or profound learning disability should be able to access a range of meaningful day opportunities appropriate to their needs.</p>	<ol style="list-style-type: none"> 1. Percentage of adults with a severe or profound learning disability who have meaningful day opportunities in non-segregated settings. 2. Percentage of adults with a severe or profound learning disability who express satisfaction with the choice of day opportunities they can access. 	<p>Establish baseline.</p> <p>Year on year increase to be determined once baseline established.</p> <p>Establish baseline.</p> <p>Year on year increase to be determined once baseline established.</p>
<p>Standard 16:</p> <p>All parents with a learning disability should be supported to carry out their parenting role effectively.</p>	<ol style="list-style-type: none"> 1. Develop and agree a regional protocol between children's and adult services for joint working and care pathways. 2. Percentage of parents with a learning disability who have a multi-professional/agency competence based assessment. 3. Percentage of parents with a learning disability involved in child protection or judicial processes who have received locally based skills training. 4. Percentage of parents with a learning disability involved in child protection or judicial processes who have access to the services of an independent advocate. 	<p>HSC Board in collaboration with all Trusts.</p> <p>Establish baseline.</p> <p>Performance levels to be determined once baseline established.</p> <p>85%</p> <p>90%</p> <p>95%</p> <p>Establish baseline.</p> <p>Performance levels to be determined once baseline established.</p>

Meeting General Physical and Mental Health Needs

STANDARD	KEY PERFORMANCE INDICATORS	ANTICIPATED PERFORMANCE LEVEL
Standard 17: All people with a learning disability should have equal access to the full range of health services including services designed to promote positive health and wellbeing.	<ol style="list-style-type: none"> 1. All acute hospitals should have an action plan for implementing the GAIN Guidelines for improving access to acute care for people with a learning disability. 2. Percentage of GPs who have a system for identifying people with a learning disability on their register. 3. Each GP practice has a designated link professional within local learning disability services. 4. Evidence of reasonable adjustments by health service providers. 	<p>All HSC Trusts establish baseline.</p> <p>Performance levels to be determined once baseline established.</p> <p>Baseline as per learning disability DES.</p> <p>Performance levels to be determined once baseline established.</p> <p>Establish baseline.</p> <p>Performance levels to be determined once baseline established.</p> <p>Establish baseline.</p> <p>Performance levels to be determined once baseline established.</p>
Standard 18: (Generic) HSC should work in co-operation with voluntary, education, youth and community organisations to prevent young people from starting to smoke.	<ol style="list-style-type: none"> 1. Percentage of 12, 14 and 16 year old boys and girls with a learning disability who smoke. 	<p>5% decrease on baseline for boys (rate has been constant).</p> <p>Maintain at baseline for girls (rate has been increasing therefore initial target to halt rise).</p>

STANDARD	KEY PERFORMANCE INDICATORS	ANTICIPATED PERFORMANCE LEVEL
Standard 19: (Generic) All HSC professionals should identify those who smoke, make them aware of the dangers of smoking, advise them to stop and provide information and signposting to specialist cessation services.	1. Smoking cessation service available to people with a learning disability. 2. Percentage of clients quitting at 4 and 52 weeks.	Maintain 2007/08 baseline levels 4% increase in uptake. Establish baseline 2% increase in number of quitters (4% increase in uptake of services) 2% increase in number of quitters (4% increase in uptake of services).
Standard 20: All people with a learning disability should be supported to achieve optimum physical and mental health.	1. Each HSC Trust has a health improvement strategy for people with a learning disability (children and adults) to address all relevant physical and mental health promotion and improvement needs. 2. Percentage of adults with a learning disability who have an annual health check. 3. Percentage of adults with a learning disability, who have an up to date and active Health Action Plan (HAP) following the annual health check. 4. Percentage of people with a learning disability who have been examined by a dentist in the past year. 5. Percentage of females with a learning disability who access cervical and breast screening services.	All Trusts have in place a health improvement strategy for people with a learning disability. Establish baseline. Performance levels to be determined once baseline established. Establish baseline. Performance levels to be determined once baseline established. Establish baseline. Performance levels to be determined once baseline established. Establish baseline.

		Performance levels to be determined once baseline established.

STANDARD	KEY PERFORMANCE INDICATORS	ANTICIPATED PERFORMANCE LEVEL
Standard 21: All people with a learning disability who experience mental ill health should be able to access appropriate support.	<ol style="list-style-type: none"> 1. A regional protocol is developed to ensure that people with a learning disability can access mainstream mental health services. 2. Percentage of people with a learning disability and mental health needs who access mainstream mental health services e.g. psychological and talking therapies where indicated in their treatment plan. 3. Percentage of Health Action Plans and health checks which include mental health assessment and mental health promotion. 	Protocol in place. Establish baseline. Performance levels to be determined once baseline established. Establish baseline. Performance levels to be determined once baseline established.
Standard 22: (Generic) People with a learning disability should be provided with healthy eating support and advice, appropriate to their needs, in a range of settings.	<ol style="list-style-type: none"> 1. Percentage of nutrition advisers using the Eat Well/Getting the Balance Right plate model. 2. Percentage of people eating the recommended 5 pieces of fruit or vegetables a day. 3. Services available for people with a learning disability. 	Establish baseline. Performance level to be determined once baseline established. 10% increase on 2005/06 baseline. Establish baseline. Performance level to be determined once baseline established.

STANDARD	KEY PERFORMANCE INDICATORS	ANTICIPATED PERFORMANCE LEVEL
<p>Standard 23: (Generic)</p> <p>HSC professionals should work with early years settings, schools, workplaces and communities in the promotion and support of breastfeeding, healthy eating and physical activity to prevent obesity.</p>	<ol style="list-style-type: none"> 1. Percentage of people with a learning disability who have a BMI of above 25. 2. Percentage of P1 Children who have been identified as being overweight and obese or underweight and malnourished. <p>NOTE: these P1s will be reviewed in light of the forthcoming obesity strategy.</p> <ol style="list-style-type: none"> 3. Percentage of Health Action Plans for those identified as overweight that include actions on support on healthy eating and fitness. 	<p>2% decrease on 2005/06 baseline.</p> <p>Establish baseline.</p> <p>Performance level to be determined once baseline established.</p> <p>Establish baseline.</p> <p>Performance level to be determined once baseline established.</p>
<p>Standard 24: (Generic)</p> <p>HSC professionals should identify inactive individuals and, where appropriate, provide them with advice and support to accumulate a minimum of 30 minutes of moderate activity on 5 days of the week or more.</p>	<ol style="list-style-type: none"> 1. Percentage of people with a learning disability being asked and advised about their physical activity. 2. Percentage of people with a learning disability being asked and advised about their physical activity who achieve the recommended level of physical activity. 	<p>Establish baseline.</p> <p>Performance level to be determined once baseline established.</p> <p>Establish baseline.</p> <p>Performance level to be determined once baseline established.</p>

STANDARD	KEY PERFORMANCE INDICATORS	ANTICIPATED PERFORMANCE LEVEL
<p>Standard 25: (Generic)</p> <p>Primary care professionals should identify people with a learning disability who consume hazardous/harmful amounts of alcohol, make them aware of the dangers, advise them to reduce or stop and provide information and signposting to specialist services if appropriate.</p>	<p>1. Percentage of people with a learning disability who receive Brief Intervention in Primary care to reduce alcohol related risk.</p>	<p>Establish baseline.</p> <p>Performance level to be determined once baseline established.</p>

Meeting Complex Physical and Mental Health Needs

STANDARD	KEY PERFORMANCE INDICATORS	ANTICIPATED PERFORMANCE LEVEL
<p>Standard 26:</p> <p>All people with a learning disability whose behaviour challenges should be able to get support locally from specialist learning disability services.</p>	<ol style="list-style-type: none"> 1. Percentage of individuals with significant challenging behaviours who have a Behaviour Support Plan including advance directives in place that detail actions to be undertaken in the event of their challenging behaviours escalating. 2. Where challenging behaviours present a significant risk to the individual or others or a risk of breakdown in accommodation arrangements, a specialist assessment has been completed within 24 hours. 3. Where challenging behaviours present a significant risk to the individual, a Management Plan has been developed and implemented within 48 hours. 4. Evidence that HSC has engaged with other relevant delivery partners in developing and implementing consistent approaches in individual cases. 5. Percentage of people labelled as challenging who are not living in a congregate setting described as a challenging behaviour or specialist assessment/treatment service. 	<p>Establish baseline.</p> <p>Performance level to be determined once baseline established.</p> <p>Establish baseline.</p> <p>Performance level to be determined once baseline established.</p> <p>Establish baseline.</p> <p>Performance level to be determined once baseline established.</p> <p>All HSC Trusts</p> <p>Establish baseline.</p> <p>Performance levels to be determined once baseline established.</p>

STANDARD	KEY PERFORMANCE INDICATORS	ANTICIPATED PERFORMANCE LEVEL
Standard 27: All people with a learning disability who come into contact with the Criminal Justice System should be able to access appropriate support.	1. Evidence that the HSC has engaged and developed local protocols with relevant delivery partners to achieve consistent and co-ordinated approaches to working with people with a learning disability who have offended or are at risk of offending.	Protocols in place.

At Home in the Community

Standard 28: HSC professionals should work in partnership with a variety of agencies in order to ensure that the accommodation needs of people with a learning disability are addressed.	1. Percentage of support plans that take account of people's aspirations in relation to future accommodation needs, including independent living. 2. Percentage of parents with a learning disability who have a multi-professional/agency competence based assessment. 3. Percentage of people in receipt of public funding living in households of 5 people or less with a learning disability. 4. Percentage of people (including the resettlement population) leaving learning disability hospital within one week after treatment has been completed. <p>Standard 33:</p> <p>All people with a learning disability being assessed for supportive and palliative care should have their learning disability taken into account in consultation with them and their carer.</p>	<ol style="list-style-type: none"> 1. Palliative care services have mechanisms to identify whether people have a learning disability. 2. Evidence of specific actions in service delivery that make reasonable adjustment for their learning disability. 	<p>Establish baseline.</p> <p>Performance levels to be determined once baseline established.</p> <p>Establish baseline.</p> <p>Performance levels to be determined once baseline established.</p>

A NOTE ON TERMINOLOGY

The following terms will be used throughout this document:

‘carer’ will be used to describe a family member including children and young people or informal carers

‘HSC organisation’ will be used to describe a variety of health and social care providers, such as, the HSC Board, HSC Trusts and the Public Health Agency.

‘service user’ will be used to describe those who use learning disability services

A glossary of terms used is provided in Annex A

CHAPTER 1: INTRODUCTION TO SERVICE FRAMEWORKS

Background

The overall aim of the Department of Health, Social Services and Public Safety (DHSSPS) (the Department) is to improve the health and social wellbeing of the people of Northern Ireland (NI).

In support of this the Department is developing a range of Service Frameworks, which set out explicit standards for health and social care that are evidence based and capable of being measured.

The first round of Service Frameworks focuses on the most significant causes for ill health and disability - cardiovascular health and wellbeing; respiratory health and wellbeing; cancer prevention, treatment and care; mental health and wellbeing; and learning disability. Work has also commenced to develop Service Frameworks for children and young people and older people.

Service Frameworks have been identified as a major strand of the reform of health and social care services and provide an opportunity to:

- strengthen the integration of health and social care services;
- enhance health and social wellbeing, to include identification of those at risk, and prevent/ protect individuals and local populations from harm and /or disease;
- promote evidence-informed practice;
- focus on safe and effective care; and
- enhance multi-disciplinary and inter-sectoral working.

Aim of Service Frameworks

Service Frameworks will set out the standards of care that service users, their carers and wider family can expect to receive in order to help people to:

- prevent disease or harm;
- manage their own health and wellbeing including understanding how lifestyle affects health and wellbeing including the causes of ill health and its effective management;
- be aware of what types of treatment and care are available within

health and social care; and

- be clear about the standards of treatment and care they can expect to receive.

All Service Frameworks incorporate a specific set of standards that are identified as Generic. These, essentially, are intended to apply to all the population, or all HSC professionals or all service users, regardless of their health condition or social grouping. These include:

- involvement (Generic Standard 2, page 43)
- communication (Generic Standard 4, page 48);
- smoking prevention & cessation (Generic Standards 18 & 19, pages 89-92)
- healthy eating & physical activity (Generic Standards 22 to 24, pages 99-106);
- alcohol (Generic Standard 25, page 107); and
- palliative care (Generic Standard 32, page 131).

These Generic standards reinforce the holistic approach to health and social care improvement and reflect the importance of health promotion in preventing medical or social care issues occurring in the first place. Their inclusion ensures:

- equality of opportunity for all;
- the communication of consistent messages to service users and providers of HSC; and
- a consistent approach in the design and delivery of services.

Respondee are asked to note that the existing set of generic standards, as set out above, is currently under review, and may change in future in light of the evidence base.

Service Frameworks will be used by a range of stakeholders including commissioners, statutory and non-statutory providers, and the Regulation and Quality Improvement Authority (RQIA) to commission services, measure performance and monitor care.

The Frameworks will identify clear and consistent standards informed by expert advice, research evidence and by national standard setting bodies such as the National Institute for Health and Clinical Excellence (NICE) and the Social Care Institute for Excellence (SCIE). The auditing and measuring of these standards will be assisted by the Guidelines and Implementation Network (GAIN) which will facilitate regional audit linked to priority areas, including Service Frameworks.

The standards, in the context of the 10 year Quality Strategy¹, will aim to ensure that health and social care services are:

- i. **Safe** – health and social care which minimises risk and harm to service users and staff;
- ii. **Effective** – health and social care that is informed by an evidence base (resulting in improved health and wellbeing outcomes for individuals and communities), is commissioned and delivered in an **efficient** manner (maximising resource use and avoiding waste), is **accessible** (is timely, geographically reasonable and provided in a setting where skills and resources are appropriate to need) and **equitable** (does not vary in quality because of personal characteristics such as age, gender, ethnicity, race, disability (physical disability, sensory impairment and learning disability), geographical location or socioeconomic status).
- iii. **Person centred** – health and social care that gives due regard to the preferences and aspirations of those who use services, their family and carers and respects the culture of their communities. A person of any age should have the opportunity to give account of how they feel and be involved in choices and decisions about their care and treatment dependent on their capacity to make decisions. In absence of the capacity to make decisions they should listen to those who know and care for the person best.

¹ Quality 2020: A 10-Year Quality Strategy for Health and Social Care in Northern Ireland

Involving and communicating with service users, carers and the public

The Department has produced guidance, “Strengthening Personal and Public Involvement in Health and Social Services”², which sets out values and principles which all health and social care organisations and staff should adopt when engaging with the public and service users. These include the need to involve people at all stages in the planning and development of health and social care services. This policy position has been strengthened by the introduction of the Health and Social Care (Reform) Act (Northern Ireland) 2009 and the statutory duty it places on HSC organisations to involve and consult with the public. (Art 19)

It is important that the views of service users and carers are taken into account when planning and delivering health and social care. The integration of the views of service users, carers and local communities into all stages of the planning, development and review of Service Frameworks is an important part of the continuous quality improvement and the open culture which should be promoted in HSC.

The Department is committed to involving those who use learning disability services (experts by experience), their carers and wider families. Through the proactive involvement of the service users and carers in the planning of Service Frameworks, it is hoped that concerns and ideas for improvement can be shared and that the standards developed in partnership with service users, carers and the public will focus on the issues that really matter to them.

It is also important that Service Frameworks provide service users and carers with clear and concise information, which is sensitive to their needs and abilities, so that they can understand their own health and wellbeing needs. To facilitate this, easy access versions will be made available for all Service Frameworks. Service Frameworks will also be made available in various other formats e.g. Braille, large print and audio tape. The Department will also

² DHSSPS (2007) Guidance on Strengthening Personal and Public Involvement in Health and Social Care (HSC (SQSD) 29/07) http://www.dhsspsni.gov.uk/hsc_sqsd_29-07.pdf

consider requests for other formats or translation into ethnic minority languages.

People are ultimately responsible for their own health and wellbeing and that of their dependents, and it is important that service users, their carers and wider family are made aware of the role they have to play in promoting health and wellbeing.

Involving other agencies in promoting health and wellbeing

Improving the health and wellbeing of the population requires action right across society and it is acknowledged that health and wellbeing is influenced by many other factors such as poverty, housing, education and employment. While Service Frameworks set standards for providers of health and social care services it is essential that HSC services work in partnership with other government departments and agencies both statutory and non-statutory to seek to influence and improve the health and social wellbeing of the public.

People who use health and social care services, including learning disability services, may have complex needs which require inputs from a range of health and social care professionals and other agencies.

The benefits of multidisciplinary team working and multiagency working, including voluntary and community organisations, are well recognised and it is a key component of decision making regarding prevention, diagnosis, treatment and ongoing care. This will be a key theme underpinning the development and implementation of Service Frameworks.

Data Collection

As Service Frameworks are implemented it is important that timely, accurate information is available to support decision-making and service improvement.

To support this, data sources are identified, early in the development stage, to match the key performance indicator (KPI) data definitions. It is through the

data source that progress can be monitored. Where robust baseline data is not available Frameworks will be looking to audits, including Self Assessment Audit Tools (SAATs), to gather information, establish baselines and set future performance levels.

Research and Development

It is important that Service Frameworks are based on valid, relevant published research, where available, and other evidence.

Education and Workforce

Education and workforce development occur at individual, team, organisational, regional and national levels: they are part of the drive to promote quality. The ongoing development and implementation of Service Frameworks will influence the education and training agenda and curricula content for all staff involved in the delivery of health and social care. This will require a commitment to lifelong learning and personal development alongside a focus on specific skill areas to ensure that newly qualified and existing staff are in a position to deliver on quality services.

Leadership

Effective leadership is one of the key requirements for the implementation of Service Frameworks and will require health and social care professionals from primary, community and secondary care to work together across organisational boundaries, including other governmental departments and the voluntary and community sectors. It is essential that Service Frameworks are given priority at senior, clinical and managerial level and implemented throughout all HSC organisations.

Affordability

Extensive discussions have been held on the overall affordability of the Learning Disability Service Framework. It should be noted that several of the

standards do not require additional resources and should be capable of delivery within existing baselines.

For a number of performance indicators, a baseline data source has not been identified. It is proposed that audits will be used to obtain this information. For example, the Guidelines and Audit Implementation Network (GAIN) will be utilised as a means of resourcing some of these audits and Self Assessment Audit Tools (SAAT) will be developed to measure performance subject to some pilot work required to determine resource implications of such tools.

It is recognised that the standards and associated performance indicators will be challenging for the HSC Services and Family Practitioner Services and a phased approach has been developed to ensure that the standards and associated performance levels can be delivered within the resources available in the current Comprehensive Spending review (CSR) with most implementation activity in Year 1 largely focused on benchmarking and decisions taken on the setting of Key Performance Indicators (KPIs) in Year 2 and 3 based on known affordability parameters once benchmarking has been completed.

It will be for the HSC Board and the Public Health Agency to provide assurance to the Department on progress towards implementation of the standards.

CHAPTER 2: LEARNING DISABILITY SERVICE FRAMEWORK

Introduction

The aim of the Learning Disability Service Framework is to improve the health and wellbeing of people with a learning disability, their carers and their families by promoting social inclusion, reducing inequalities in health and social wellbeing, and improving the quality of care.

The Learning Disability Service Framework sets standards in relation to:

- communication and involvement in the planning and delivery of services
- children and young people
- entering adulthood
- inclusion in community life
- meeting general physical and mental health needs
- meeting complex physical and mental health needs
- at home in the community
- ageing well
- palliative and end of life care

The Learning Disability Service Framework is initially for a three-year period from 2012 – 2015. It will be the subject of further review and continuing development as a living document as performance indicators are achieved, evidence of changed priorities emerge and new performance indicators are identified.

Process for developing the Learning Disability Service Framework

The development of Service Frameworks is overseen by a multi-disciplinary Programme Board, which is jointly chaired by the Chief Medical Officer and the Deputy Secretary of the Department. The Learning Disability Service Framework was lead by a Project Board who were accountable to the Department's Programme Board for ensuring the completion of the project within agreed timescales and to DHSSPS guidelines. The Project Board was

informed by a project team with representation from all aspects of the service including service users, carers, advocates and voluntary organisations. The full project membership is set out in Annex B.

In order to develop the standards, 5 working groups were established which ensured broader representation and expertise. These groups and their membership are set out in Annex C. These groups produced the preliminary reports that informed the development of the standards.

External quality assurance was provided by Mr Rob Greig, National Development Team for Inclusion (NDTi) and Dr Margaret Whoriskey, Scottish Executive.

Equality Screening

The Framework has been screened to take account of Section 75 of the Northern Ireland Act 1998 and any potential impact that the Framework might have on Human Rights. It is the recommendation of the Project Team that the Framework does not negatively impact on equality of opportunity and therefore does not require a full Equality Impact Assessment.

Values

The core values outlined in the Equal Lives Review (2005) have been adopted in full in the development of the Learning Disability Service Framework. These core values when enshrined in practice will ensure that independence is promoted for all people with a learning disability. (Annexe D)

Policy and Legislative Context

The Learning Disability Service Framework is congruent with the legal and policy context for the delivery of supports to people with a learning disability. This has over recent years increasingly been underpinned by concepts of rights, inclusion and citizenship.

The onus on public authorities to promote equality of opportunity is also enshrined in the Northern Ireland Act (1998) which states that “*a public authority shall, in carrying out its functions in Northern Ireland, have due regard to the need to promote equality of opportunity between persons with a disability and persons without.*”

The Reform and Modernisation of Mental Health and Learning Disability Services Review (Bamford - May 2007)

A review of policy, practice and legislation relating to Mental Health and Learning Disability was commissioned by DHSSPS in October 2002. The Review concluded in August 2007 and produced ten reports (Annex E) that detailed the vision for supporting people with a learning disability, promoting mental health and wellbeing at all levels of society and for the delivery of specialist health and social care for everyone who needs it.

The DHSSPS response to Bamford, ‘Delivering the Bamford Vision’ (2008) (the Action Plan) states, “*the Northern Ireland Executive accepts the thrust of the recommendations*”, and sets out proposals to take the recommendations forward over the next 10 – 15 years.

The Learning Disability Service Framework builds on the approaches to supporting people with a learning disability proposed in the Bamford Review and the subsequent Action Plan.

Consistency with other documents

The Learning Disability Service Framework has taken cognisance of reports and documents that have been or are being developed by DHSSPS and other regional groups, including:

- *Investing for Health* strategies;
- The Quality Framework – as outlined in *Best Practice Best Care* (2001);
- The *Reform and Modernisation* of HSC;
- Personal and Public Involvement (PPI) (DHSSPS, 2007)
- National Institute for Health and Clinical Excellence guidance (NICE)
- Social Care Institute for Excellence guidance (SCIE)

Human Rights and Social Inclusion

A key priority for health and social care services and the wider community is to tackle stigma, discrimination and inequality and to empower and support people with a learning disability and their families to be actively engaged in the process. This is underpinned by legislation from Europe and the United Kingdom (UK). A summary of all the relevant legislation can be found in “Promoting Social Inclusion”, The Reform and Modernisation of Mental Health and Learning Disability Services (Bamford - May 2007) and the “Human Rights and Equality” Report (Bamford - October 2006).

Human rights, as enshrined in the Human Rights Act (1998) UK, derive from the fundamental principles that:

- human beings have value and should be treated equally based on the fact that they are human beings first and foremost; and
- human worth is not based on either capacity or incapacity.

Human rights include the right to life, liberty and security and respect for a private and family life.

How to read the rest of this document

Each Service Framework follows an individual’s journey from infancy through to end of life care taking into account the different health and social care needs of children, adults and older people. In the Learning Disability Service Framework each standard is accompanied by a statement written from the perspective of a person with a learning disability, in order to make them more meaningful to those for whom the Framework is primarily aimed.

Each standard sets out the evidence base and rationale for the development of the standard, the impact of the standard on quality improvement as well as the performance indicators that will be used to measure that the standard has been achieved within a specific timeframe. Each standard is presented in the same way. Figure 1 shows the information that is included in each standard.

Explaining the Standards

Overarching Standard This is a short statement that outlines what will be delivered and includes a statement written from the perspective of a person with a learning disability			
Rationale This is a short section that outlines why/how the standard will make a difference for people using learning disability services.			
Evidence This includes brief references for the research evidence or guidance that the standard is based on.			
Responsibility for delivery/implementation This lists the HSC organisations tasked with responsibility for delivering the standard. It will include partners in care such as other government departments and agencies and voluntary organisations and community groups that have contractual or service level agreements with health and social care organisations.			
Quality Dimensions The impact of the standard on quality improvement is identified in relation to the five core values outlined in the Equal Lives Review (2005) (Annexe D). These include: <ul style="list-style-type: none"> • Citizenship • Social Inclusion • Empowerment • Working Together • Individual Support 			
Performance Indicator This information will be monitored to show if the standard is being delivered.	Data Source This identifies where the information will be derived from.	Anticipated Performance Level This describes how well the service must perform against this indicator.	Date to be achieved by This specifies when the anticipated performance level should be reached.

Figure 1

Many of the standards apply to both adult services and services for children and young people. Each standard has been colour coded for ease of reference.

Standard applies to children, young people and adults with a learning disability

Standard applies only to children and young people with a learning disability

Standard applies only to adults with a learning disability

The rest of this document is divided into the following chapters:

- **Chapter 3** sets out the rationale for developing a Learning Disability Service Framework
- **Chapter 4** sets out the standards for communication and involvement in the planning and delivery of services
- **Chapter 5** sets out the standards for children and young people
- **Chapter 6** sets out the standards for entering adulthood
- **Chapter 7** sets out the standards for inclusion in community life
- **Chapter 8** sets out the standards for meeting general physical and mental health needs
- **Chapter 9** sets out the standards for meeting complex physical and mental health needs
- **Chapter 10** sets out the standards for at home in the community
- **Chapter 11** sets out the standards for ageing well
- **Chapter 12** sets out the standards for palliative and end of life care

CHAPTER 3: WHY DEVELOP A SERVICE FRAMEWORK FOR LEARNING DISABILITY?

Introduction

Learning disability may be defined as follows:

A learning disability includes the presence of a significantly reduced ability to understand new or complex information or to learn new skills (impaired intelligence), with a reduced ability to cope independently (impaired social functioning), which started before adulthood with a lasting effect on development. (Equal Lives, 2005)

Prevalence of Learning Disability

In determining the prevalence of learning disability in NI the Bamford Review (2005) cited a study based on information held by the former Health and Social Services Trusts, which estimated the numbers as shown in Table 1.

Table 1: Prevalence Rates (per 1,000) (15)

Age Bands	Mild/Moderate	Severe/Profound	Total
0-19	6432	1718	8150
20-34	2504	1047	3551
35-49	1489	949	2438
50+	1473	753	2226
Totals	11,898	4468	16,366

However, the Review notes that these figures may be an underestimate as many people classed as *possibly having learning disability* may not be making any demands on health and social care services at present but could do so in the future.

Nonetheless, the overall prevalence rate of 9.7 persons per 1000 is higher than that reported for the Republic of Ireland (RoI) and for regions of Great Britain (GB).

The Review also anticipates that there will be increased numbers of people with a learning disability in the next 15 years. In addition, it notes the likelihood that higher proportions of these individuals will have increased care and support needs due to old age or additional complex needs.

Of particular importance to their quality of life is the need to promote their inclusion in society so that individuals with a learning disability can participate in the communities in which they live and access the full range of opportunities open to everyone else.

Developing a Service Framework for people with a learning disability serves a number of functions:

- For people with a learning disability, it details what it is they can expect in terms of care and support to meet their individual needs in ways that they understand and are accessible.
- For carers and families of people with a learning disability, it outlines what it is they can expect in terms of access to services for their family member and of their involvement as partners in the planning processes.
- For staff in front line service delivery, it enables them to communicate effectively in assisting people with a learning disability to access mainstream and specialist HSC services appropriately.
- For commissioners and those with responsibility for the delivery of services in the statutory and independent sectors, it assists them in achieving an integrated model of services and supports around the person in line with the expectations of service users and their families.

Relating the Learning Disability Service Framework to other Service Frameworks

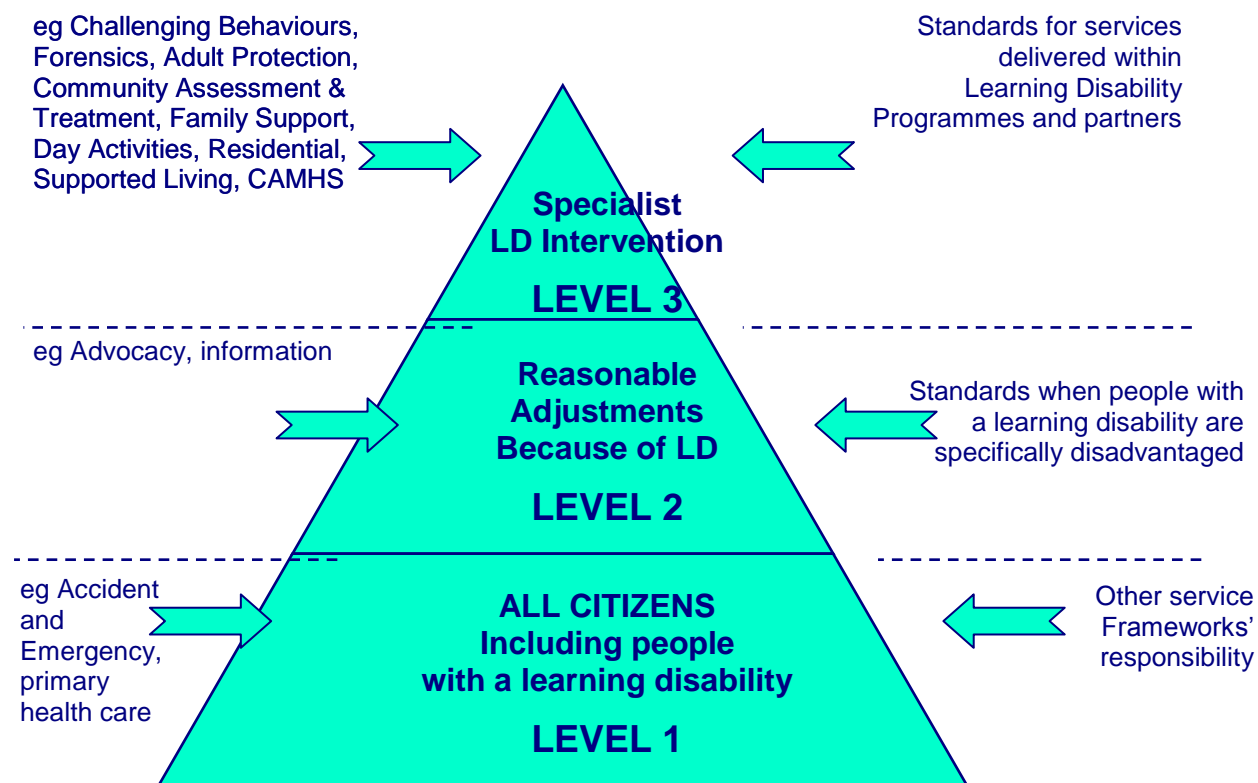

Figure 2

Figure 2 above describes the relationship between the Learning Disability Service Framework and other service frameworks. Each service framework identifies standards related to a specific aspect of health and social care. The needs of people with a learning disability will also be addressed through these frameworks (Level 1).

In many instances HSC providers will need to make adjustments to the care and support they offer in order to make them accessible to people with a learning disability and their families. Current evidence indicates that these necessary adjustments are not consistently in place within HSC services. Standards in the Learning Disability Service Framework will therefore require all HSC services to take the needs of people with a learning disability into account when designing and delivering services (Level 2).

While the basic premise of the Learning Disability Service Framework is that people with a learning disability should access the same HSC services as other people, there are occasions when special expertise or support is required. As services become more inclusive it is anticipated that the volume and range of separate services will decrease as learning disability expertise is developed within mainstream HSC services.

The Learning Disability Service Framework identifies a range of minimum standards that reflect the current service configuration in order to ensure that people with a learning disability and their families are clear about the care and support they can expect from these services (Level 3). Services provided through the non-statutory sector through contractual or service level agreements with HSC Trusts are also expected to meet these standards.

CHAPTER 4: COMMUNICATION AND INVOLVEMENT IN THE PLANNING AND DELIVERY OF SERVICES

Effective communication is fundamental to the delivery of high quality health and social care. Without it there can be no meaningful partnership with service users and carers. Poor communication is often a significant contributory factor in complaints against HSC organisations and underpins many of the negative user experiences reported in research.

Involving people with a learning disability and their carers in the planning, delivery and monitoring of services helps to ensure that the care and support received meets their needs and aspirations. Involvement has to occur at all levels in HSC from ensuring service users' and carer's views are represented in organisational structures for the design and delivery of services, to securing a person-centred approach in all individual care and support arrangements.

Involvement is much more than consulting and informing and includes engagement, active participation, partnership working, user control and management of services, such as, Direct Payments.

There are particular challenges in meaningfully involving people with learning disability given the communication impairments they may experience and the legacy of discrimination which has served to exclude them from decision making fora in the past. Effective service user involvement needs to be underpinned by access to advocacy and information, alongside a clear understanding of issues related to capacity and informed consent.

Standard 1:

People with a learning disability should be involved as a matter of course in making choices or decisions about their individual health and social care needs. The views of their family, carers and advocates should be taken into account in the planning and delivery of services unless there are explicit and valid reasons to the contrary agreed with the person.

Service user perspective:

"I am involved as a matter of course in making choices or decisions about my health and social care needs."

"My family, other carers and advocates are involved as partners."

"Staff ask for my views and the views of family carers when they are planning and delivering services."

Rationale:

People with a learning disability and family carers report a lack of engagement and exclusion from the planning and decision-making processes, which can result in services being unresponsive to individual needs, strengths and aspirations. It is important to ensure that people with a learning disability and their families are involved as partners in their health and social care.

Services must be delivered in ways that appropriately manage risk for service users, carers and their families. It is acknowledged, however, that in some situations, living with an identified risk can be outweighed by the benefit of having a lifestyle that the individual really wants and values. In such circumstances, risk taking (when it is appropriately managed) can be considered to be a positive action. HSC staff need to work in partnership with service users and carers to explore choices, identify and assess risks and agree on how these will be managed and minimised for the benefit of individual service users, their carers and families.

HSC Trust reports (care plans)	Establish baseline Performance level to be determined once baseline established	Year 1 Year 2

Standard 2: (Generic)

People with a learning disability, their family and carers should have opportunities to engage actively and meaningfully with health and social care organisations at all levels.

Service user perspective:

“I will have an opportunity to engage actively and meaningfully at all levels of health and social care.”

Rationale:

Actively involving people in the planning and provision of health and social care has been noted to bring many advantages. These include:

- increased service user satisfaction
- improved communication between service users and professional staff
- better outcomes of care with greater accessibility and responsiveness of services
- lessening the power imbalance between those receiving services and those who work in them
- recognition of the expertise of service users and their families.

Involving people with a learning disability and their carers in service planning and delivery from the outset will help to ensure that the supports developed are responsive to the expressed needs and aspirations of people with a learning disability.

their family and carers have been involved in the planning and delivery of services.			
--	--	--	--

Standard 3:

People with a learning disability should be helped by HSC professionals to develop their capacity to give or refuse informed consent.

Service user perspective:

"I am helped by staff to give or refuse my consent when decisions are being made that will affect my health or wellbeing."

Rationale:

Respecting peoples' right to determine what happens to them is a fundamental aspect of good practice and a legal requirement. Research shows that people with a learning disability are often denied this right. Health and social care staff report uncertainty about how to ensure capacity and informed consent. This covers a wide range of areas from managing personal finances to consenting to surgery and other medical interventions. A major legislative reform process is underway that will strengthen the legal framework for work in the area of mental capacity and consent. HSC organisations should be working within the spirit of this legislative direction.

2 Evidence that robust processes are in place where capacity has been judged to be an issue within HSC services or services commissioned by HSC	SAAT	Development and implementation of SAAT Performance levels to be determined based on outcomes of SAAT	Year 1 Year 2

Standard 4: (Generic)

People with a learning disability should expect effective communication with them by HSC organisations as an essential and universal component of the planning and delivery of health and social care.

Service user perspective:

"I am supported by staff who can communicate well with me."

Rationale:

Between 50% and 90% of people with a learning disability have some form of communication difficulty. Effective communication has a significant impact on all aspects of care and support provision across the full range of activities that promote health and social wellbeing. Poor communication is often a significant contributory factor in complaints against HSC organisations.

People with speech, language and communication needs, in addition to their learning disability, are amongst the most vulnerable and most in need of effective care and support to reach their potential. Early identification and effective intervention are essential. The current system is characterised by high variability and a lack of equity.

Quality Dimension

Citizenship

Good communication helps to ensure input by people with a learning disability on all aspects of the services that they receive, assisting in the highlighting of gaps in provision and areas for improvement.

Social Inclusion

People with communication difficulties are supported to access mainstream leisure and social activities that promote their integration into mainstream community living and promote their psychological and emotional wellbeing.

Empowerment

Good communication with service users, carers and family enables adequate understanding of, and consent to, the care, support and treatment arrangements offered.

Working Together

There is evidence of good communication between professionals that can determine early identification of communication difficulties and planning to provide the necessary supports to the person with a learning disability, their carer and family and that this is reviewed regularly with particular attention at transition points.

Individual Support

Good communication is a prerequisite of person-centredness.

Performance Indicator	Data source	Anticipated Performance Level	Date to be achieved by

speech as their main form of communication, who have been supported to establish a functional communication system.		to be determined based on SAAT outcomes	
---	--	---	--

Standard 5:

People with a learning disability should receive information about services and issues that affect their health and social wellbeing in a way that is meaningful to them and their family.

Service user perspective:

"I receive information about services and issues that affect my health and wellbeing in a way that my family and I can understand."

Rationale:

The particular communication difficulties experienced by many people with a learning disability create additional challenges in accessing information on which to make informed choices and access appropriate supports. Access to HSC services depends on people having information on what is available and how the care and support offered will impact on them. This places an onus on HSC organisations to ensure that people with a learning disability, their carers and their families are informed in a way that takes account of their particular circumstances.

This process will be enhanced by the availability of a named staff member to assist people in understanding the services available.

Evidence:

Responsibility for delivery/implementation		Delivery and Implementation Partners	
<ul style="list-style-type: none">• HSC Board (including Commissioning Groups)• Public Health Agency (PHA)• HSC Trusts		<ul style="list-style-type: none">• DHSSPS, DSD, DE, DEL, DoJ• Other service providers• Advocacy partners• Service users and carers	
Quality Dimension			
Citizenship People with a learning disability can only exercise their rights as citizens if they have accessible information about entitlements and services offered.			
Social Inclusion A major barrier to inclusion is the lack of information on which to base informed decision making.			
Empowerment Access to information enables people to speak out about what they need and what is being offered.			
Working Together Provision of information in an accessible manner is a key step towards enabling effective partnership between those who work in services and those who use them.			
Individual Support The development of effective person-centred support relies on individuals being well informed about choices that are open to them.			
Performance Indicator	Data source	Anticipated Performance Level	Date to be achieved by
1 All HSC organisations should provide evidence that they are making information accessible to people with a learning disability	SAAT	Development and implementation of SAAT	Year 1
		Performance levels to be determined once baseline established	Year 2
2 Each person with a learning disability can access a named person who can signpost them to relevant services.	Sample survey of families and service users.	Establish baseline of information provided Performance levels to be determined once baseline established	Year 2

Standard 6:

People with a learning disability, or their carer, should be able to access self directed support in order to give them more control and choice over the type of care and support they receive.

Service user perspective:

“I, or my carer, can request self-directed support in order to give me more control and choice over the type of care and support I receive.”

Rationale:

There is growing evidence of the positive outcomes that may be gained by people with a learning disability when they have direct financial control over their supports. Access to Direct Payments as a means of delivering social services in NI has been available since 1996 under the Personal Social Services (Direct Payments) (Northern Ireland) Order 1996. The Carers and Direct Payment Act (NI) 2002 extended access to a much wider group of people. Direct Payments increase choice and promote independence. They provide for a more flexible response than may otherwise be possible for the service user and carer. They allow individuals to decide when and in what form services are provided and who provides them, who comes into their home and who becomes involved in very personal aspects of their lives. Direct Payments put real power into the hands of service users and carers, and allow them to take control over their lives. Whilst uptake of this provision has been low, it has been steadily increasing over recent years.

In England, direct payments have paved the way for investigation into how individual budgets could work to promote choice and control for people using adult social care services. The introduction of individual or personal budgets is part of the wider personalisation agenda in adult social care. At the time of preparing the Learning Disability Service Framework an equivalent policy directive relating to the use of individual budgets is not in place. However, DHSSPS have indicated its commitment, in the Bamford Action Plan, to exploring the benefits of increasing users' direct control over services. The implementation (and review) of this standard will, therefore, evolve alongside future policy developments in this area.

Quality Dimension

Citizenship

Increased equity exists between service users and service providers where human rights have been respected.

Social Inclusion

Quality of life and wellbeing are improved through being able to have direct control over funding available to support social inclusion activities

Empowerment

Service users and carers experience more choice and control within processes and access services that they have requested and, where necessary, have the support of independent advocates.

Working Together

Change in attitudes and culture with renewed engagement between agencies on joint support planning providing greater flexibility in the way in which supports can be accessed.

Individual Support

People demonstrate improved health and wellbeing from having greater control over how they are supported and having their aspirations met in a more individualised way.

Performance Indicator	Data source	Anticipated Performance Level	Date to be achieved by
1 Evidence of provision of accessible information on Direct Payments within HSC organisations.	SAAT	Develop and implement SAAT Establish performance levels based on outcomes from SAAT	Year 1 Year 2
2 Percentage of requests for direct payments from people with a learning disability that were approved	SAAT	Develop and implement SAAT Establish performance levels based on outcomes from SAAT	Year 1 Year 2
3 Number of adults with a learning disability in receipt of Direct Payments expressed as a percentage of those in contact with Trust (regional percentage is 2.25%)	HSC Board and Trust Reports	Performance levels to be determined based on available resources and included in final Framework	
4 Number of children with a learning disability in receipt of Direct Payments expressed as a percentage of those in contact with Trust (regional percentage is 3.50%)	HSC Board and Trust Reports	Performance levels to be determined based on available resources and included in final Framework	

5	The HSC Board and Trusts have plans in place to extend the range and scope of self directed support including how they will develop skills and expertise in relevant staff	HSC Board and Trust reports	HSCB and all Trusts	Year 3
---	--	-----------------------------	---------------------	--------

Standard 7:
People with a learning disability using learning disability services have access to advocacy services in both community and hospital settings.

Service user perspective:

“I can get an advocate to support me to speak out about worries I have about the care and support I receive”

Rationale:

Advocacy promotes personal empowerment and self-determination. Advocacy assists service users to express their views and take an active part in decision-making. This is particularly important for people with a learning disability who are at greater risk of having their views overlooked or ignored. Advocacy is a key element of ensuring that people have control of their own lives and is especially important where tensions exist between the opinions of the person with a learning disability and their carer(s).

Evidence

Responsibility for delivery/implementation

- HSC Board
- HSC Trusts
- Public Health Agency (PHA)

Delivery and Implementation Partners

- Other service providers
- Advocacy partners
- Service users and carers

Quality Dimensions

Citizenship

People with a learning disability may require additional support to exercise their rights as citizens. Access to a range of advocacy supports enables their views and opinions to be central to decision making and planning processes.

Empowerment

Access to advocacy support enables people to speak out about what they need and what is being offered.

Individual Support

The role of an advocate in understanding and communicating what is important to the person in regard to their lifestyle and aspirations is vital. This is especially so where the person does not have anyone other than health and social care professionals to advocate on their behalf or where there are conflicting views about their needs and how best to meet them.

Performance Indicator	Data Source	Anticipated Performance Level	Date to be achieved by
1 Percentage of services for people with a learning disability commissioned or provided by HSC that comply with DHSSPS guidelines on advocacy	Trust Reports	Establish baseline Performance levels to be determined once baseline established	Year 2 Year 3

CHAPTER 5: CHILDREN AND YOUNG PEOPLE

Work is ongoing in the development of a Children and Young People's Service Framework. It is anticipated that this Framework will address the universal needs of children and young people in Northern Ireland.

This chapter aims to address the particular issues facing children and young people with a learning disability and their family carers. This chapter should be read alongside the other standards set out in this Framework.

Support to families tends to be fragmented and parents report difficulty in accessing services and understanding the range of roles and services that are in place.

It is crucial when concerns emerge that a child may have a learning disability, that a clear action plan is agreed as to how the concerns will be investigated. It is essential that planning and support systems are used to wrap around the child and family to ensure a seamless and co-ordinated approach. Where children have to live away from their family the arrangements in place must take account of their learning disability.

The Learning Disability Service Framework reflects the fundamental position that regardless of diagnosis, a child/young person is a child/young person first, and that children and their families should be fully supported to participate in valued childhood experiences. They should also have access to the same opportunities, life experiences and services as other children and families.

Standard 8:

From the point at which concerns are raised that a child or young person may have a learning disability, there is an action plan in place to determine the nature and impact of the learning disability.

Service User Perspective:

Parents will have an action plan that clearly sets out the steps to be taken for discovering the nature and impact of learning disability their son or daughter may have.

Rationale:

Parents report dissatisfaction with the manner in which supports are organised when concerns begin to emerge that their son or daughter may have a learning disability. Professional efforts are often not well co-ordinated resulting in parents having to manage multiple appointments and, at times, conflicting advice.

Long delays are reported for appointments to specialists and parents can experience great difficulties in accessing the information they need and in understanding the roles that various professionals and organisations play.

Assessment needs to be timely, comprehensive and conducted in a co-ordinated manner.

Evidence:

Power, A (2008) 'It's the system working for the system': carers' experiences of learning disability services in Ireland: *Health and Social Care in the Community* (2008) <http://onlinelibrary.wiley.com/doi/10.1111/j.1365-2524.2008.00807.x/abstract>

1 Percentage of parents who express satisfaction with the assessment process and how the outcomes were conveyed.	Audit of sample family carers	Establish baseline of information provided Performance levels to be determined once baseline established	Year 2 Year 3

Standard 9:

Children and young people should receive child-centred and coordinated services through assessment to ongoing care and support from the point at which a determination has been made that they have a learning disability.

Service user perspective:

“My son or daughter receives services that are child-centred, appropriate and co-ordinated.”

Rationale:

The Children Order (NI) 1995 outlines that a child is a ‘child in need’ by virtue of the fact that he/she is disabled (Art17(C)). Trusts and statutory bodies are required to comply with their statutory duties in respect of children in need, including those in relation to carers needs under this legislation.

Getting the right care and support for children, young people and their families makes a significant impact on positive outcomes in adulthood. A child’s needs cover the whole range of public services and resources including play, leisure, housing and education. The involvement of all these interests is essential if we are to avoid confining the lives of children with a learning disability within the health and social care system.

<ul style="list-style-type: none">• HSC Board• HSC Trusts/Children's Services	<ul style="list-style-type: none">• Families• DHSSPS, DE, DCAL• Voluntary and community sector providers

Quality Dimension

Social Inclusion

Assessment and supports take account of the need for the child or young person to have as normal a life as possible and be socially included within the communities in which they live.

Empowerment

Children, young people and their families receive co-ordinated essential information about the services they can expect to receive and the roles that professionals will have in delivering these services and have an identified link person to whom they can refer any problems and with whom they can develop effective relationships.

Working Together

Professionals work together with parents as partners in developing family centred plans to meet the care and support needs of the child and his/her family. Plans must take account that the needs of children and young people with a learning disability cannot be met by health and social care alone and will involve close working with other interests including housing, leisure and education.

Individual Support

Supports are co-ordinated effectively between professionals and the family and the child/young person has a plan in place that is regularly reviewed to ensure that supports remain appropriate.

Performance Indicator	Data source	Anticipated Performance Level	Date to be achieved by
1 Percentage of children and young people with a learning disability and carers who have been offered an assessment either under the Family Health Needs Assessment or UNOCINI assessments.	Audit/Sampling	Establish baseline Performance levels to be determined once baseline established	Year 2 Year 3
2 Percentage of children and young people who have an agreed support plan detailing a pathway to receiving appropriate care and support.	Audit to include UNOCINI referrals and completed family support and Looked After Children (LAC) pathway assessments following initial referral	Establish baseline Performance levels to be determined once baseline established	Year 2 Year 3

Standard 10:

HSC services should respond to the needs of children and young people who have a learning disability and complex physical health needs in a manner that is personalised, developmentally appropriate and which support access to appropriate care.

Service User Perspective:

“If my son or daughter has complex physical health needs we will receive care and support in a flexible way through services that are age appropriate.”

Rationale:

Current services often lack the responsiveness and flexibility required to ensure that children and young people with a learning disability enjoy equal access to the full range of supports that are required to effectively address the needs arising from additional health problems they have. This can result in them receiving care and treatment that is less than optimum, is poorly coordinated, and sometimes delivered in settings, which are not developmentally appropriate.

Children and young people with a learning disability benefit greatly from effective transitions between hospital and community services and sensitive, detailed assessment and care planning across the range of HSC professionals involved with the family.

- HSC Trusts / Children's Services
- Primary and Acute Services

Delivery and Implementation Partners

- DHSSPS
- Voluntary & Community Sector Providers
- Families & carers

Quality Dimension

Citizenship

The rights of the child/young person/family are respected when assessing their needs and practical approaches are taken to meeting these needs that are equitable to the rest of the population.

Working Together

There is a coordinated approach to addressing health and social care needs where parents are clearly signposted to sources of care and support, particularly when the child/ young person moves between hospital and home.

Individual Support

Multi-disciplinary input is effective in providing assessment and supports that the child and family requires using person-centred and family centred approaches that are effective in maintaining, where possible, ordinary family life and are reviewed regularly or at least annually.

Performance Indicator	Data source	Anticipated Performance Level	Date to be achieved by
1 Percentage of parents whose child has a learning disability and complex physical health needs who have, and can name, their key worker with co-ordinating responsibility	Annual Audit	Scope requirements and produce audit plan.	Year 1
		Audit 50% of information available	Year 2
		100%	Year 3

2	Percentage of children and young people with complex physical health needs who have effective transition arrangements in place between hospital and community. 3	Percentage of children with a learning disability and complex physical health needs who have received a multi-professional assessment using the UNOCINI frameworks.	Trust Reports	<p>90%</p> <p>95%</p> <p>98%</p>	<p>Year 1</p> <p>Year 2</p> <p>Year 3</p>
4	Percentage of children and young people with a learning disability and complex physical health needs who are receiving care under the integrated care pathway.	SAAT	<p>Develop and implement SAAT</p> <p>Performance levels to be determined based on SAAT outcomes.</p>	<p>Year 1</p> <p>Year 2</p>

Standard 11:

Any child or young person who cannot live at home permanently should have their needs addressed in a way that takes full account of their learning disability.

Service User Perspective:

"If I cannot live at home permanently, my needs will be addressed in a way that takes full account of my learning disability."

Rationale:

A small number of children and young people who have a learning disability cannot live with their natural families. Many have severely challenging behaviours, specific health needs and/or Autistic Spectrum Disorders (ASD). They require support and living arrangements that are sufficiently expert to address their complex individual needs. Decisions about future care and support arrangements need to be taken in a timely manner and in a way that supports permanency.

Evidence:

Responsibility for delivery/implementation	Delivery and Implementation Partners
<ul style="list-style-type: none"> • HSC Board • HSC Trusts 	<ul style="list-style-type: none"> • DHSSPS • Other Service Delivery Partners

Quality Dimension**Citizenship/Social Inclusion**

Children & young people with a learning disability have their needs met within environments that promote social inclusion and full citizenship

Empowerment

Children, young people and their family members are supported to express their views on the care and support services that they require and are supported to maintain links with each other when a child/young person lives away from home.

Working Together

Professionals collaborate to provide responsive services through developing a person-centred Permanency Plan to meet the needs of the individual child/young person.

Individual Support

The Permanency Plan includes arrangements for specialist placements based on the short, medium and long term needs of the individual.

Performance Indicator	Data source	Anticipated Performance Level	Date to be achieved by
1 Percentage of looked after children or young people with a learning disability who cannot live with their families who have a Permanency Plan.	SOSCARE	Establish baseline Performance level to be determined once baseline established	Year 1 Year 2
2 Percentage of looked after children or young people with a learning disability who cannot live at home, who have access to specialised placements where the need for this is indicated in the Permanency Plan.	SOSCARE	Establish baseline Performance level to be determined once baseline established	Year 1 Year 2

CHAPTER 6: ENTERING ADULTHOOD

The manner in which young people are supported at the time of transition from adolescence to adulthood is a crucial component in determining the degree to which they are enabled to live full and valued lives in their communities.

Supporting effective transition is the responsibility, not only of HSC organisations, but also requires the effective engagement of other government departments, notably DEL and DE, and other agencies. There is scope for improvement in the quality of the transition experience. Many young people have unsatisfactory experiences during the move from school towards adulthood.

Parents and young people should be offered a transitions pathway that outlines their:

- individual interests;
- aspirations;
- strengths and needs including vocational training;
- education;
- employment;
- health profile;
- social supports;
- friendships (including meaningful relationships); and
- social development.

Standard 12:

Young people with a learning disability should have a transition plan in place before their 15th birthday and arrangements made for their transition to adulthood by their 18th birthday.

Service User Perspective:

"I will have a transition plan in place before my 15th birthday."

"I will know the arrangements that are in place for when I leave school before my 18th birthday."

Rationale:

Effective transition planning at an early stage is vital if young people are to move successfully from school towards fuller adult lives. This is a statutory requirement under special education legislation and a recommendation of the Bamford Review. These arrangements should be made in partnership with the young person, their family/carers and adult learning disability services for transition to appropriate adult services in accordance with agreed transition protocols. The objective of this transition planning is to support people into the same life chances as other non-disabled young people e.g. a job, relevant education, positive relationships and the start of living independently.

It is noted that increased numbers of children with statements of special education needs, including those with disabilities are accessing mainstream education. Under the Special Educational Needs and Disability (NI) Order 2005 (SENDO) Code of Practice, transition planning in schools commences for 'statemented' pupils at the first annual review following the child's 14th birthday. The Education and Library Board's (ELB) Transition Service will ensure, in the most complex of cases, that appropriate advice givers will be present as part of the annual review process. Transition planning and services should be available, with young people and carers made aware of them, and able to access transition supports following post primary education with sufficient forward planning to minimise apprehension and stress for those young people and their carers.

Responsibility for delivery/implementation

- HSC Board
- Public Health Agency (PHA)
- HSC Trusts

Delivery and Implementation Partners

- DHSSPS, DE (ELBs, schools and FE colleges), DEL
- Education Transitions Co-ordinators
- Voluntary agencies
- Youth services
- Councils
- Independent providers
- RQIA
- Young people and their families
- Advocacy organisations

Quality Dimension

Citizenship

A common assessment pathway will help to ensure equity of services for all.

Social Inclusion

Accessible information will be provided to allow young people, their carers and relevant others to participate fully in the development of a transition plan. Such information is available in a range of media and from a wide range of sources. Young people's involvement will create a move away from a narrow focus on services to a broader expression of aspirations for the future.

Empowerment

The process of preparing the Transitions Plan will place the young person and his/her family at the centre of planning for the future

Working Together

Decisions about eligibility for services will be the outcome of a multi-disciplinary assessment, and will be open and transparent for parents. The plan will be developed on a multi-disciplinary/multi agency basis with clear accountability lines for delivery by all the contributors.

Individual Support

A preliminary assessment will feed into an individualised transitions plan. Each plan will reflect the young person's aims and objectives in life including specific individual needs and interests, continuing education and training, employment, social and leisure activities and day opportunities.

Performance Indicator	Data source	Anticipated Performance Level	Date to be achieved by
1 Percentage of 15 year olds with a learning disability who have a written plan in place that they and their families have contributed to.	SAAT	Develop and implement SAAT Performance levels to be determined based on SAAT outcomes	Year 1 Year 2
2 Percentage of young people who express satisfaction that their transition plan has been implemented within 2 years of leaving school.	SAAT	Develop and implement SAAT Performance levels to be determined based on SAAT outcomes	Year 2 Year 3
3 Evidence of transfer to DES for health checks for children on transition to adult services.	DES	90% 95% 98%	Year 1 Year 2 Year 3

Standard 13:

Men and women with a learning disability should be supported to have meaningful relationships, which may include marriage and individual, unique, sexual expression within the law, balancing their rights with responsibilities.

Service User Perspective:

"I will be supported to enjoy meaningful relationships."

Rationale:

The Bamford Review promotes the importance of people with a learning disability benefiting from meaningful relationships and the need to offer support, guidance, training and related services to ensure that this happens.

The Human Rights Act 1998 includes the right to respect for privacy and family life, freedom of expression, the right to marry and to found a family and the right not to be discriminated against in respect of these rights and freedoms. This has to be balanced with positive risk taking strategies. Safeguards need to be put in place, where necessary and appropriate, but within a framework that ensures the objective is to support people who are having positive relationships whenever possible.

Education programmes for people with a learning disability should begin during adolescence as part of their general education. The implementation of this standard will need to be supported by the provisions detailed in Standard 3 (Consent and Capacity).

CHAPTER 7: INCLUSION IN COMMUNITY LIFE

Emotional and social wellbeing are directly related to the degree to which people are able to live valued lives and participate in community opportunities.

For people with a learning disability barriers can exist which prevent them from accessing the opportunities that are open to the rest of society. Many of these barriers do not relate directly to the disability, but rather are the result of discrimination and approaches based on a belief that social education and leisure opportunities need to be provided within the context of HSC provision. This has resulted in the social exclusion of people with a learning disability and the development of services that group people together on the basis of a shared learning disability, rather than addressing individual needs and aspirations.

The HSC has a role in working with others in employment, housing, leisure and education to maximise opportunities that enable people with a learning disability to actively participate in their communities and engage in meaningful daytime activities, friendships, employment and leisure.

The majority of men and women with a learning disability live at home with their families. Appropriate short breaks are often an important component in supporting these arrangements.

Increasingly people with a learning disability express an aspiration to have children. HSC services must work together to ensure that people who have a learning disability are appropriately supported in their parenting role.

Standard 14:

Adults with a learning disability should be able to access support in order that they can achieve and maintain employment opportunities in productive work.

Service User Perspective:

"I will be able to get support to help me find and keep a job."

Rationale:

The Lisbon Agenda (2000) promotes the integration of people traditionally excluded from the labour market. The Bamford Review recommends that agencies should work in partnership to promote and deliver supported employment services. HSC Trust day opportunities strategies promote the development of supported employment as an integral part of service development.

A cultural shift away from a reliance on day centres should be encouraged, towards alternative options which enable individuals with a learning disability to participate in society through day opportunities and work placements that will improve their skills and allow them the opportunity to integrate with others. Those involved in person centred planning should actively consider employment as one of these options.

Quality Dimension

Working Together

HSC staff, in partnership with DEL and others, will enable people with a learning disability to achieve and maintain employment opportunities with ongoing professional support.

Social Inclusion

Historically there have been barriers to opportunities for meaningful employment for men and women with a learning disability. Increasing such opportunities will be a key contributor to improving social inclusion.

Performance Indicator

Data source

Anticipated Performance Level

Date to be achieved by

1 Percentage of school leavers with a learning disability who access work placements or employment within one year of leaving school (as percentage of total learning disabled school leaving population).

ELB Transition Service

Establish baseline

Year 1

Performance levels to be determined once baseline established

Year 2

2 Percentage of adults with a learning disability who receive HSC support to help them secure employment (as a measure of those who request support).

Audit

Establish baseline

Year 1

Performance levels to be determined once baseline established

Year 2

Standard 15:

All adults with a severe or profound learning disability should be able to access a range of meaningful day opportunities appropriate to their needs.

Service User Perspective:

"I will be supported to take part in a range of activities during the day"

Rationale:

There is a need for a radical reconfiguration of existing day service provision based on a progressive shift towards a resource model. As alternative provision develops there should be a reduction in the number of people who attend Adult Centres on a full-time basis. It is anticipated that these centres will, in the future, be providing a service to men and women with increasingly complex needs who should also be enabled to access opportunities for community integration. Adult Centres will need to explore the potential to develop sites for meeting the particular needs of people with more complex needs. The potential for Adult Centres to be used as a community resource is particularly under-utilised at present. Partnerships with community and voluntary groups should involve promoting the inclusion of people with a learning disability.

Evidence:

Quality Dimension**Social Inclusion**

Reconfiguration of day centres may reduce the number of days attended and an

expansion of wider community options for individuals.

Working Together

Each person will have a person-centred plan which will identify the multi-disciplinary and community inputs required to deliver on that plan. A lead person will be accountable for the delivery of the plan, which must be reviewed 6 monthly.

Individual Support

Admission criteria and processes in day centres will be in line with the standard and clear processes will be in place to consider intake and development of opportunities in local communities.

Performance Indicator	Data source	Anticipated Performance Level	Date to be achieved by
1 Percentage of adults with a severe or profound learning disability who have meaningful day opportunities in non-segregated settings.	SAAT	Develop and implement SAAT Performance levels to be determined based on SAAT outcomes	Year 1 Year 2
2 Percentage of adults with a learning disability supported by HSC who express satisfaction with the choice of day opportunities they can access.	SAAT	Develop and implement SAAT Performance levels to be determined based on SAAT outcomes	Year 1 Year 2

Standard 16:

All parents with a learning disability should be supported to carry out their parenting role effectively.

Service User Perspective:

“If I have children I will get support to be a good parent.”

Rationale:

An increasing number of adults with a learning disability are becoming parents. In about 50% of cases their children are removed from them largely because of concerns about the children’s wellbeing or the lack of appropriate support.

Barriers to the provision of appropriate supports include negative and stereotypical attitudes. Men and women with a learning disability have a right to be parents and where they choose to exercise this right, effective support should be in place to avoid adverse outcomes for them and their children.

If support is provided early it is more likely that the family unit will be successfully supported to stay together.

Evidence:

Responsibility for delivery/implementation

- HSC Board
- Public Health Agency (PHA)
- HSC Trusts

Delivery and Implementation Partners

- DHSSPS
- Community and voluntary sector providers
- Advocacy services

Quality Dimension

Citizenship

Independent advocacy support is provided to enable parents with a learning disability to be involved in the decision making process within multi-disciplinary meetings and other decision making fora.

Social Inclusion

Supports provided promote and encourage the parents to become less isolated from the community in which they live.

Empowerment

More parents and their children will be receiving appropriate care and support resulting in a smaller percentage of children of parents with learning disabilities being subject to Care Orders.

Working Together

Professionals work collaboratively across children's and adult's services to provide effective support to the parent and work will continue to develop policy on positively supporting parents with a learning disability to continue caring for their children.

Individual Support

Parents will be better enabled to care for themselves and their children through having their needs properly assessed and being appropriately supported in their parenting role.

Performance Indicator

CHAPTER 8: MEETING GENERAL PHYSICAL AND MENTAL HEALTH NEEDS

Physical and mental health are inextricably linked with each impacting upon the other. The World Health Organisation (WHO) gives equal value to physical and mental health in the definition of health as “a complete state of physical, mental and social wellbeing, not just the absence of disease and infirmity”. People with poor physical health are at higher risk of experiencing common mental health problems and people with mental health problems are more likely to have poor physical health. Many factors influence the health of individuals and communities. Whether people are healthy or not depends a great deal on their circumstances and the environment in which they live. The determinants of health and wellbeing include:

- social environment
- the physical environment
- the person’s individual characteristics and behaviour

Many of these factors of health are not under the direct control of the individual and therefore one person’s health may differ from another’s depending on their circumstances.

Evidence demonstrates that there are significant disparities in health outcomes for people with a learning disability. They experience higher levels of physical and mental ill health, yet have lower access to primary care services, health screening and health promotion activities.

People with a learning disability can experience difficulties when using general health services, hospitals and primary care services. There is a need to proactively ensure that there is equity of access to the full range of health care services enjoyed by the general population. This is enshrined in disability discrimination and human rights legislation.

Standard 17:

All people with a learning disability should have equal access to the full range of health services, including services designed to promote positive health and wellbeing.

Service User Perspective:

"I have equal access to the full range of health services as other people in the community."

Rationale:

It is known that people with a learning disability often experience difficulties when using health services and this can result in their health needs not being effectively assessed or met.

Most people with a learning disability do not require specialist services to address their health needs but many will require a range of reasonable adjustments to help them make use of generic health services such as primary care, acute hospitals and dentistry. Specialist learning disability services are a key resource to support mainstream health services develop the knowledge and skills to do this effectively.

Reasonable adjustments can be many and are wide ranging, but it is important to remember that they must be individualised to the person, and may include such things as:

- longer appointment times
- offering the first or last appointment
- the provision of easy read information to enhance understanding
- close involvement and support of family carers
- appropriate waiting facilities
- pre-admission visits
- fast tracking arrangements when appropriate (e.g. in A&E Departments)

The standard links closely to Standards 4 and 5 (Communication and Involvement in the Planning and Delivery of Services).

4 Evidence of reasonable adjustments by health service providers.	Report from HSC Trust learning disability services	Establish baseline Performance levels to be determined once baseline established	Year 1 Year 2

Standard 18: (Generic)

HSC should work in co-operation with voluntary, education, youth and community organisations to prevent young people from starting to smoke.

Service user perspective:

"I will be prevented from starting to smoke"

Rationale:

Smoking is one of the recognised risk factors for many physical illnesses such as cardiovascular disease, respiratory disease and cancer. Its effects are related to the amount of tobacco smoked daily and the duration of the smoking.

Stopping young people from starting to smoke is crucial to reducing smoking levels, as evidence suggests that 82% of adult smokers started in their early teens (Tobacco Action plan). The Young People Behaviour and Attitude Surveys in 2000 and 2003, have shown that the rates of boys smoking every day has remained constant (25.2% and 23.9% of sample) whilst girls who smoke every day has increased (24.9% and 30.6% of sample).

Current interventions have not been shown to stop recruitment to smoking by young people. There is some evidence that "The Smoke Busters" programme delays the age onset.

Evidence:

Citizenship People with a learning disability can exercise their rights as citizens if they have accessible information to inform decision-making			
Empowerment Access to tobacco education should be accessible to all young people in a range of media settings			
Working together Provision of information in an accessible format is a key step towards enabling effective partnership between those who work in services and those who use them			
Individual Support Effective person-centred support should take account of balancing what is important to people with what is important to them in regard to their health and wellbeing.			
Performance Indicator	Data source	Anticipated Performance Level	Date to be achieved by
1. Percentage of 12, 14 and 16 year old boys and girls with a learning disability who smoke	Establish baseline data from Young People Behaviour and Attitude Survey (2007) in 12, 14 and 16 year olds Survey repeated 3 yearly (subject to available resources)	5% decrease on baseline for boys (rate has been constant) Maintain at baseline for girls (rate has been increasing therefore initial target to halt rise)	Year 1 Year 1

Standard 19: (Generic)

All HSC professionals should identify those who smoke, make them aware of the dangers of smoking, advise them to stop and provide information and signposting to specialist cessation services.

Service user perspective:

"I will be advised on the dangers of smoking"

Rationale:

Few people in Northern Ireland today could claim to be unaware of the harm caused by smoking. However, despite widespread public knowledge, it is important to continue to develop sustained public information and education campaigns to raise awareness of issues relating to tobacco use, such as the health risks to smokers and non-smokers.

Smoking is the single greatest cause of preventable illness and premature death in Northern Ireland, killing around 2,300 people each year. Of these deaths, approximately 800 are as a result of lung cancer, which is now the most common cause of cancer death for both men and women. Smoking and its harmful effects cuts across all barriers of class, race and gender. However, a strong relationship exists between smoking and inequalities, with more people dying of smoking related illnesses in disadvantaged areas of Northern Ireland than in more affluent areas.

Evidence:

		4% increase in uptake	Year 2
		4% increase in uptake	Year 3
2 Percentage of clients quitting at 4 and 52 weeks		Establish baseline	Year 1
		2% increase in number of quitters (4% increase in uptake of services)	Year 2
		2% increase in number of quitters (4% increase in uptake of services)	Year 3

Standard 20:

All people with a learning disability should be supported to achieve optimum physical and mental health.

Service User Perspective

I will be helped to stay as physically and mentally healthy as possible.

Rationale:

People with a learning disability are more likely to experience major illnesses, to develop them younger and die of them sooner than the population as a whole. They have higher rates of obesity, respiratory disease, some cancers, osteoporosis, dementia and epilepsy. It is estimated that people with learning disability are 58 times more likely to die prematurely. However, even with such a dramatic health profile, the learning disabled population are less likely to get some of the evidence-based treatments and checks they need, and continue to face real barriers in accessing services. This contributes to preventable ill health, poor quality of life and potentially, premature death.

Effective screening and regular health checks help to identify unmet need and prevent health problems arising. People with a learning disability participate less in screening and regular health checks than the rest of the population. Information on, and activities in, health promotion can be difficult to access.

Quality Dimension

Citizenship
People with a learning disability are supported to access the full range of screening and health checks as the rest of the population of NI.

Social Inclusion
Screening and health checks are made accessible to people with a learning disability and they are facilitated to participate in these activities.

Empowerment/Individual Support
Individuals will be supported to have regular screening and health checks on all the major illnesses and facilitated to make lifestyle choices that promote their good health and have in place a Health Action Plan as part of their person centred plan.

Working Together
There should be effective liaison and evidence of advance planning between HSC staff and family carers to fully embrace people with learning disabilities into the system of regular screening and health checks and health promotion activities. This should incorporate the development of Health Action Plans which includes details of health interventions, oral health, fitness and mobility, emotional needs and records of screening tests and identification of those responsible for taking action.

5 Percentage of females with a learning disability who access cervical and breast screening services.	GP records Health facilitators	Establish Baseline Performance levels to be determined once baseline established	Year 1 Year 2

Standard 21:

All people with a learning disability who experience mental ill health should be able to access appropriate support.

Service User Perspective

"If I have mental illness I can get appropriate support."

Rationale:

People with a learning disability and mental health needs require a co-ordinated multi-disciplinary approach to having their needs met through integrated services responding flexibly to the demands of their conditions with clear pathways of care identified so that the most appropriate supports are immediately available to the person and their family carers when required.

Standard 22: (Generic)

People with a learning disability should be provided with healthy eating support and advice, appropriate to their needs, in a range of settings.

Service user perspective:

"I will be provided with healthy eating support and advice"

Rationale:

Eating well and healthy helps to prevent many diseases which are linked to being overweight such as high blood pressure, high blood sugar, heart problems, risk of stroke, cancer, joint problems and sleeping difficulties to name just a few. Eating well also helps to make people emotionally well and improve mental health and wellbeing.

3 Services available for people with a learning disability	Trust report	Establish baseline Performance level to be determined once baseline established	Year 1 Year 2

Standard 23: (Generic)

HSC professionals should work with early years settings, schools, workplaces and communities in the promotion and support of breastfeeding, healthy eating and physical activity to prevent obesity.

Service user perspective:

"I will be supported to make healthy food choices, cook healthy meals, be active in my every day life and maintain a healthy weight"

Rationale:

Over the years the evidence has mounted regarding the health disparities among people with learning disabilities, and a recent overview of screening projects amongst people with a learning disability in Northern Ireland indicated that weight issues (including obesity, overweight and underweight status) along with oral health problems were some of the most commonly occurring issues.

There is also evidence that although people with a learning disability are more likely to suffer from nutritionally related ill-health, this is often less recognised by support staff and professionals than when in the general population. Other common age related disorders such as hypertension (high blood pressure), stroke and coronary heart disease are similar to levels within the general population however many of these conditions and the associated ill-health are avoidable. People with learning disabilities are also frequently poorer, live in more challenging circumstances and can be socially excluded, all of which can contribute to poorer eating patterns. A recent report by the Caroline Walker Trust suggests there is an urgent need for training regarding enabling people with a learning disability to eat well and understand healthy choices. Evidence has also suggested that people with learning disabilities have up to a 58% increased risk of dying before they are 50 years of age compared to the general population. This increased risk of mortality is highly likely linked to poor nutritional status as well as contributing to ill health and poorer quality of life. It is suggested that there is insufficient attention paid to the health needs of people with a learning disability, a lack of basic health promotion and insufficient support to achieve a healthy lifestyle, all of which now need addressed.

Overall people with a learning disability tend to lead more sedentary lifestyles than the general population, performing significantly less than the recommended minimum levels of physical activity. Levels of obesity appear to be rising among adults with a learning disability in Northern Ireland.

Men and women with a learning disability may also develop what are known as syndrome-specific conditions including congenital heart defects/visual and hearing disorders (Down's), musculo - skeletal problems (Fragile-X) and obesity related diabetes (Prader-Willi).

Standard 25: (Generic)

Primary care professionals should identify people with a learning disability who consume hazardous/harmful amounts of alcohol, make them aware of the dangers, and advise them to reduce or stop and provide information and signposting to specialist services if appropriate.

Service user perspective:

"I will receive information and advice on alcohol misuse"

Rationale:

As more people with a learning disability are living in accommodation in the community with minimal support, they may be exposed to greater social stressors leading to increased use of alcohol as a coping mechanism or stress reliever.

The needs of people with a learning disability who misuse substances have rarely been addressed. Some mainstream addiction services exclude this population highlighting a lack of knowledge.. Consequently, many individuals continue to "fall through the cracks" across both service providers as they lack the appropriate personnel and resources to manage this population and that of their carers.

Evidence:

- HSC Trusts

Delivery and implementation partners

- Primary care team, inclusive of social care

Quality Dimension

Citizenship

People with a learning disability and alcohol related issues should be able to access mainstream services. They are likely to require the support of learning disability personnel to utilise the services offered by the mainstream addiction teams.

Working Together

Brief Intervention Training for Health and Social Care Staff will ensure clients receive consistent and timely advice on alcohol consumption.

Individual Support

HSC staff should take account of what and who is important to the person now and in the future in relation to lifestyle and where alcohol fits in. Explore how alcohol can be managed in the person's life by taking account of what has worked and what has not worked in the past for this person.

CHAPTER 9: MEETING COMPLEX PHYSICAL AND MENTAL HEALTH NEEDS

Children and adults with a learning disability may experience significant additional, complex health needs. Complex physical and mental health needs may be defined as those requiring a range of additional support services beyond the type and amount required by people generally and those usually experienced by people with impairments and long-term illnesses. These needs require a high level of effective integration between specialised and general services.

Supports to children, young people and adults who have complex physical and mental health needs will be most effective if they are based on person-centred planning approaches and within an ethos of ensuring bridging between learning disability expertise and other service settings. (Standard 10 sets out the specific standard for children and young people with complex physical health needs).

Standard 26:

All people with a learning disability whose behaviour challenges should be able to get support locally from specialist learning disability services.

Service User Perspective:

I can get support locally from specialist learning disability services if my behaviour challenges services and/or my carers

Rationale:

Emerson (1995) defines 'challenging behaviour' as behaviour of such intensity, frequency or duration that the physical safety of the person or others is placed in serious jeopardy, or behaviour which is likely to seriously limit or deny access to the use of ordinary community facilities.

People who present behaviours that challenge services are generally well known to staff working within specialist learning disability services and they are therefore in a position to provide relevant information to other services and support the person and family carers to enable him/her to continue to access these services.

The specialist supports available should include social work, psychiatry, psychology, speech and language therapy, physiotherapy, nursing and any other relevant disciplines and these should be available 24 hours a day, 7 days a week. Should crises occur there needs to be the capacity to respond with appropriate interventions that maintain the person in the community/home in which he/she resides and/or short breaks that provides time out from the situation.

Whilst significant evidence exists as to the need for timely, flexible, home-based support to address challenging behaviours and to prevent unnecessary inpatient admission, work is not complete on the optimum service configuration and models required in Northern Ireland. To develop community based supports and move away from a traditional model of hospital admission will require resource investment and future detailed service planning.

- Other service providers

Quality Dimension

Citizenship

Providing support to an individual who presents behaviours that are challenging to access mainstream health and social care services maintains their equity with the rest of the population of NI.

Social Inclusion

There are community-based services to meet the needs of people with challenging behaviour.

Empowerment

Incidents of challenging behaviours are reduced when appropriate support mechanisms are available so that they can continue to receive the community - based services they require.

Working Together

Mainstream and specialist services should be collaborating on the needs of people with a learning disability who present behaviours that challenge mainstream services so that the person can access the healthcare services they require and services comply with regional guidelines on the management of challenging behaviours.

Individual Support

Management and intervention for challenging behaviour is practised and the approaches used have proven evidence-based effectiveness and social validity.

Standard 27:

All people with a learning disability who come into contact with the Criminal Justice System should be able to access appropriate support.

Service User Perspective:

I will get support If I come in contact with the police, courts or prisons

Rationale:

Men and women with a learning disability can come into contact with the Criminal Justice System in a range of different ways. They can be suspects, remandees, prisoners or indeed witnesses. However, people with a learning disability can be particularly vulnerable as they may not understand the processes involved, the information given to them, or their rights. The Reed Report (1992) highlighted the needs of mentally disordered offenders and recommended that, where appropriate, people with a learning disability who offend should be directed to HSC services, while emphasizing the need for services to be based on a multi-agency needs assessment.

It is vital that an offender with a learning disability does not go unrecognised and unsupported whilst in the prison system and that care pathways are established between primary care, learning disability services and Criminal Justice Services.

Evidence:

approaches to working with people with a learning disability who have offended or are at risk of offending.			
---	--	--	--

CHAPTER 10: AT HOME IN THE COMMUNITY

To maximise their health and social wellbeing, people with a learning disability should be supported to live in the community close to family, friends and community resources. Where they currently live with family they (the family) should be supported to provide the necessary care and support.

A greater focus on 'purposeful lives' will support people with a learning disability to live as independently as possible. It is vital that people are supported to live in the community and that inappropriate admission to hospital is avoided. People with a learning disability who require hospital treatment should be speedily discharged when the treatment ends to community homes with appropriate care and support. Resettlement of long stay populations, the development of innovative approaches to prevent delayed discharges and the promotion of 'purposeful respite' will enhance outcomes for people with a learning disability, their families and carers.

Standard 28:

HSC professionals should work in partnership with a variety of agencies in order to ensure that the accommodation needs of people with a learning disability are addressed.

Service User Perspective:

“My accommodation needs will be met by staff from different agencies who work well together”

Rationale:

People with a learning disability aspire to have the same standard in living options that are available to their non-disabled peers.

In NI the majority of adult persons with a learning disability continue to live with family carers. As carers age, they may require extra support to maintain their caring role. In addition, people with a learning disability may need support to participate in community activities with their peers.

Person-centred support plans should identify the person’s preferred living arrangements and these should be regularly reviewed. It is important that as family carers age they are supported to plan for the future to allow for a smooth transition to new care arrangements either within the family or in supported accommodation (refer to Chapter 12: Ageing Well).

Small-scale, supported living arrangements (5 persons or less) have been shown to offer a better quality of life for people with a learning disability as compared to congregated living arrangements.

People living outside of family care should have a tenancy or occupancy agreement to offer them security of tenure along with an agreement to the number of support hours available to them individually.

People should be involved in decisions about sharing their homes with others. As far as possible they should be offered a choice of accommodation in a locality of their choosing.

--

Performance Indicator	Data source	Anticipated Performance Level	Date to be achieved by
1 Percentage of support plans that take account of people's aspirations in relation to future accommodation needs, including independent living	SAAT	Develop and implement SAAT Performance level to be determined based on SAAT outcomes	Year 1 Year 2
2 Percentage of adults who are living with a single carer or where there are 2 carers and the primary carer is aged over 65 who have a futures plan in place	SAAT	Develop and implement SAAT Performance level to be determined based on SAAT outcomes	Year 1 Year 2
3 Percentage of people in receipt of public funding living in households of 5 people or less with a learning disability	SAAT	Develop and implement SAAT Performance level to be determined based on SAAT outcomes	Year 1 Year 2
4 Percentage of people leaving learning disability hospital within one week after treatment has been completed	PfA monitoring	95% 97% 100%	Year 1 Year 2 Year 3

Standard 29:

All family carers should be offered the opportunity to have their needs assessed and reviewed annually.

Service User Perspective:

"The needs of family members who care for and support me will be assessed and regularly reviewed"

Rationale:

The majority of people with a learning disability live with their families. Nearly one-third live with a single carer and over 25% live with carers aged over 65 years. The pressures of caring can cause stress and ill health. Family carers report difficulties in accessing breaks from their caring responsibilities. The types of short breaks valued by family carers and people with a learning disability are wide ranging and needs to be flexible and responsive to the individual circumstances. This should include adult placement, drop-in services for people with a learning disability and support for the disabled family member to access social and recreational opportunities. A move away from an over reliance on short breaks in residential facilities is therefore signalled. Short breaks should be a positive experience for the person with a learning disability, adding to their lives' experiences as well as giving the family member a break.

Quality Dimension

Citizenship

Family carers have a voice in the development of strategies that impact on their role and ability to continue caring for their child, young person or adult

Social Inclusion

Carers are not left in isolation to cope with their role of caring for their child, young person or adult

Empowerment

Carers are better informed of their entitlements through the support and information they receive from professionals and /or independent advocates.

Working Together

Carers are involved in working as equal partners with statutory/other agencies in planning services that are flexible and responsive to meeting their needs and the needs of the person with a learning disability.

Individual Support

Carers of a person with a learning disability will have their support needs assessed and be provided with the services that support the family and / or the individual carer.

Performance Indicator	Data source	Anticipated Performance Level	Date to be achieved by
1 Percentage of carers offered an assessment	HSC Trust report	Establish baseline Performance levels	Year 1 Year 2

		to be determined once baseline established	
2 Percentage of carers' assessments completed	HSC Trust report	Establish baseline Performance levels to be determined once baseline established	Year 1 Year 2
3 Percentage of carers who express satisfaction at their annual review that their needs as identified in the carers' assessment have been met.	User and carer feedback	Establish baseline Performance levels to be determined once baseline established	Year 1 Year 2

CHAPTER 11: AGEING WELL

Life expectancy for men and women with a learning disability has increased markedly over recent years. Growing older is likely to present additional challenges for people with a learning disability owing to the impact of their disability.

People with Down's syndrome are at high risk of Alzheimer's disease as they grow older and virtually all people with Down's syndrome who live long enough will develop this type of dementia. In addition, it is estimated that between 20% – 40% of older people with a learning disability are liable to have a mental health problem.

The number of older family carers is also increasing which can create particular challenges, for example, older carers:

- are under greater physical and mental pressures because of their age;
- may be particularly anxious about the future;
- are more likely to be caring alone; and
- may have smaller social support networks.

There has been little emphasis on health and wellbeing for older people with a learning disability or indeed their ageing carers. Ageing well has not been proactively encouraged by service providers. This is reflected in the low number of older people with a learning disability who participate in leisure activities and in concerns about unhealthy life styles.

Standard 30:

All people with a learning disability aged 50 years and over should have the impact of ageing taken into account in having their future needs assessed and proactively managed.

Service User Perspective:

“As I get older HSC staff will support me to plan for the future taking account of my age”

Rationale:

To avoid unnecessary anxiety to the person with a learning disability and their ageing family carer they both need to think about and plan for the changes that are likely to happen in their lives. Where this is done, crisis intervention should be eliminated in all situations where a person is known to social services and their needs met when there is a requirement to do so. At the same time, plans should also be considered for the family carer, in line with the statutory entitlement to an assessment of carer's needs (as with Standard 32).

People with a learning disability should be enabled to remain in their own home with their family carer for as long as possible with appropriate care and support to do so.

People with a learning disability have the same needs for autonomy, continuity of support, relationships and leisure as other older people.

---	-------------	--	-----------------------------

Standard 31:

All people with a learning disability should have access to dementia services at whatever age it becomes appropriate for the individual.

Service User Perspective:

"I can get care and support from dementia services when I need it"

Rationale:

The early stages of dementia in people with a learning disability are more likely to be missed or misinterpreted – particularly if several professionals are involved in the person's care. The person may find it hard to express how they feel their abilities have deteriorated, and problems with communication may make it more difficult for others to assess change. It is vital that people who understand the person's usual methods of communication are involved when a diagnosis is being explored – particularly where the person involved does not use words to communicate. It is important that any prescribed medicine is monitored closely and that other ways of dealing with the situation are thoroughly explored.

People who have Down's Syndrome develop signs of dementia at a much younger age than others resulting in their needs being planned for much earlier.

Carers should be provided with information that helps them identify the earlier onset of dementia symptoms and be provided with appropriate support to continue to care for their adult with a learning disability. Carer's assessments should seek to identify any psychological distress and the psychosocial impact on the carer, including after the person with dementia has been provided with alternative care options.

Understanding a person's past history is crucial to providing person-centred care for someone with a learning disability and dementia.

|---|--|

Quality Dimension

Citizenship

People with a learning disability and dementia should have the same access to dementia services as everyone else. People with a learning disability and those supporting them should have access to specialist advice and support for dementia. People with a learning disability and dementia should feel equally valued and should not experience barriers to person-centred care.

Social Inclusion

Every effort should be made to ensure people with a learning disability and dementia are cared for at home. When a move is necessary a specific care plan should be drawn up to ensure continuity of care and support for the person and successful transfer of expertise to the new service. People with a learning disability and dementia should not be excluded from services because of their diagnosis, age (whether regarded as too young or too old) or any learning disability.

Empowerment

Treatment and care should take into account each person's individual needs and preferences. Individuals must be given all available support before it is concluded that they cannot make decisions for themselves. Advocacy services and voluntary support should be available to people with a learning disability and dementia and carers separately if required.

Working Together

There should be sharing of skills and expertise between dementia services and learning disability services with equity of access to the most appropriate service delivery area. Referral protocols and pathways need to be clearly defined to facilitate people receiving the right care and attention in the right place at the right time.

Individual Support

Carers (family, staff, statutory and independent residential and nursing care providers) should be provided with information including inter-agency working, support and training to enable them to continue to care for the person with a learning disability and dementia. Care plans should incorporate individual person centred planning principles and should reflect individually assessed dementia care related needs.

Performance Indicator	Data source	Anticipated Performance Level	Date to be achieved by
1 Percentage of people with a learning disability and dementia who can access appropriate dementia services as required.	Trust generic dementia service	Establish baseline Performance levels to be determined once baseline established	Year 1 Year 2
2 Percentage of people with a learning disability and dementia who have received additional supports following a dementia diagnosis.	SAAT	Develop and implement SAAT Performance level to be determined based on SAAT outcomes	Year 2 Year 3
3 Percentage of HSC professionals and other support providers who have received awareness training on the needs of people with a learning disability and dementia	HSC Trust report	Establish baseline Performance levels to be determined once baseline established	Year 1 Year 2

CHAPTER 12: PALLIATIVE AND END OF LIFE CARE

Palliative and end of life care focuses on all aspects of care needed by patients and their families, physical, emotional and spiritual. It involves relief of symptoms, making thoughtful decisions, supporting families and providing ongoing care in the appropriate setting. It is important that people in the last phase of life get the appropriate care, at the right time, in the right place, in a way that they can rely on. The following standards are designed to improve the patient and family experience of palliative and end of life care through *holistic assessment* of need, improved coordination of care and a greater focus on choice at end of life.

Standard 32: (Generic)

All people with a learning disability and advanced progressive conditions, their carers and families will be informed about the choices available to them by an identified team member and have their dignity protected through the management of symptoms and provision of comfort in the end of life care.

Service User Perspective:

"I will be informed about the choices available to me and have my dignity protected"

Rationale:

"End of life care" has the potential to enhance care for the dying person and their family, culminating in a well coordinated, responsive and identified approach to their unique needs at this time.

When professionals overcome their desire to protect patients from potentially distressing information and discuss end of life issues honestly, with sensitivity to patient and carer, the outcome maximises the health and wellbeing of the patient, carers and family.

Advanced care planning should include Do Not Attempt Resuscitation (DNAR) decision making and Preferred Place of Care in the event of deterioration to include hospitalisation, and intensive care, where appropriate.

Evidence:

Quality Dimension			
Working Together HSC staff work in partnership with learning disability teams in order to ensure that appropriate reasonable adjustments are made to meet the specific needs of people with a learning disability.			
Individual Support Effective joint working between palliative care services and learning disability teams will ensure that the impact of learning disability is appropriately addressed in individual treatment plans.			
Performance Indicator	Data source	Anticipated Performance Level	Date to be achieved by
Performance Indicators to be established following the review of Generic standards		Anticipated performance levels to be determined following review of Generic standards	

Standard 33:

All people with a learning disability being assessed for supportive and palliative care should have their learning disability taken into account in consultation with them and their carer.

Service User Perspective:

If my health is getting worse and I need extra support towards the end of life staff will take into account my learning disability

Rationale:

Early identification of the supportive, palliative and end of life care needs of patients, their care-givers and family, through a holistic assessment, maximise quality of life for all in terms of physical, emotional, social, financial, and spiritual health and wellbeing.

People with a learning disability are entitled to the same services and respect throughout life as anyone else. Good palliative and end of life care is about enabling the individual to live out their potential when faced with an advanced progressive illness. By addressing the physical, emotional, spiritual and social issues which often make us fearful of death, it ensures that all individuals regardless of clinical diagnosis, get the appropriate care, at the right time, in the right place, in a way they can rely on.

Where necessary, reasonable adjustments should be made to take account of the impact of learning disability. Reasonable adjustments can be many and are wide ranging, but it is important to remember that they must be individualised to the person, and may include such things as:

- longer appointment times
- offering the first or last appointment
- the provision of easy read information to enhance understanding
- close involvement and support of family carers
- partnership working between learning disability services and other service providers.
- appropriate waiting facilities
- pre-admission visits
- fast tracking arrangements when appropriate (eg in A&E Departments)

Quality Dimension

Empowerment

Involving service users, their carers and families ensures that their choices and preferences are taken into account in the design and delivery of services.

Working Together

Partnership with service users, their carers and families is only possible if they are proactively involved in decision-making processes. Effective partnerships will contribute to positive health and social care outcomes.

Individual Support

Effective person-centred support will ensure that individuals are appropriately assessed for supportive and palliative care.

Performance Indicator	Data source	Anticipated Performance Level	Date to be achieved by

in service delivery that make reasonable adjustment for their learning disability.		Performance levels to be determined based on SAAT outcomes.	Year 2
--	--	---	--------

GLOSSARY OF TERMS

TERM	DEFINITION
Acute Care	Health care and treatment provided mainly in hospitals
Advocacy	A service that provides someone to represent your views or support you in expressing your own views
Allied Health Professionals	Allied health professionals (AHPs) work with all age groups and within all specialties. AHPs work in a range of surroundings including hospitals, people's homes, clinics, surgeries and schools.
Augmented forms of communication	Better more accessible communication
Autonomy	Freedom of will
Capacity (mental)	Being able to understand and use information to make a decision
Care order	Care order is a court order made on the application of a HSC Trust and granted where the court finds the child has suffered or is likely to suffer significant harm.
Care pathway	A plan for the care needed to help a person with a learning disability to move through the different services they may need.
Challenging behaviour	When someone is behaving in a way that might cause harm to themselves or other people. Services are challenged to find a way of managing the behaviour so the chance of harm is reduced.
Citizenship	People with a learning disability being treated equally with other people.
Commissioners	A term used to describe organisations or groups who have been given responsibility for purchasing of health and social services.

Community Care	Services provided outside the hospital setting by HSC professionals and other organisations in the community.
Competency – based	An ability to do something, especially measured against a standard
Crisis intervention	A situation or period in which things are very uncertain, difficult, or painful, especially a time when action must be taken to avoid things getting much worse.
Cross-sectoral	Links between organisations managed by Government and voluntary/ community organisations and private business
Direct Enhanced Services	A Directly Enhanced Service is a specialised service provided by all GPs in N Ireland for adults with severe learning disability
Direct Payments	Direct Payments have been available since 1996 and aim to promote independence by giving people flexibility, choice and control over the purchase and delivery of services that support them. Individuals can opt to purchase services tailored to suit them by means of a Direct Payment from the Trust. From 19 April 2004 Direct Payments were extended to a wider range of service users under the Carers and Direct Payments Act (Northern Ireland) 2002 to include carers, parents of disabled children and disabled parents.
Disparities	A lack of equality between people or things
Domiciliary care	Support or care provided to a person in their own home
Dual diagnosis	Two different illnesses
Eligibility	To meet requirements for a certain criteria
Empowerment	Supporting people to take a full part in making decisions about their life.
Evidence-based practice	Doing things that have been shown to work
Health Action Plan	Describes the care and support you need to look after yourself and stay healthy.

Holistic care	Comprehensive care that addresses the social, psychological, emotional, physical and spiritual needs of the individual.
Independent sector	Organisations that are not managed by Government – includes voluntary organisations, community organisations and private business
Informed consent	Agreement by you to undergo treatment or care after being informed of and having understood the risks involved.
Integrated care pathway (ICP)	A multi-disciplinary outline of anticipated care which identifies how a patient with a specific condition will be supported by a number of professionals or agencies.
Integration	Equal access for all
Inter-agency	Links between different organisations
Legislative	To do with law
Mainstream Services	Services that anyone can use.
Methodologies	Different way of doing research.
Multi-Agency	Staff from different agencies, for example health and social care, education and employment, working together.
Multi-disciplinary	Staff from different professions, for example, nurses, doctors, social workers, working together.
Optimum	Most suitable
Palliative care	The active, holistic care of patients with advanced progressive illness. The goal of palliative care is to achieve the best quality of life for patients and their families.
Partnership working	Different organisations working together to achieve something
Person-Centred	The person and their family and friends are central and fully involved in all aspects of their care. The service, the organisation and its systems are focused on the needs of (what is important to) the individual.

Preliminary reports	Reports done at the start.
Prevalence	How many people in the population have a particular problem
Primary Care	Health and social care services that are generally available to everyone, for example, GP, dentist.
Reasonable adjustments	Actions that service providers should take to make sure people with a learning disability can use their services.
Respite	Support which gives carers a break from their usual caring roles and duties.
SAAT	Self Assessment Audit Tool – a performance management tool designed to measure the delivery of key objectives
Secondary Care	Health and social care services that help people with more complicated needs than those that primary care deal with, but mostly in the community.
Self-determination	A right to decide for self
Self-directed support	Helping people be in control of the support they need to live their life as they chose.
Service Framework	A document that sets out what people can expect the service to provide.
Service User	Anyone who uses, requests, applies for, or benefits from health and social care services.
Social inclusion	Making people with a learning disability feel part of the community they live in.
Statutory sector	Those organisations that are managed by government
Stereotypical	To categorise individuals or groups according to an oversimplified standardised image or idea
Transition	A time in a person's life when big changes are happening, for example, leaving school
Universal	Meaning all

MEMBERSHIP OF PROJECT BOARD

ANNEX D

The five core values outlined in the Equal Lives Review (2005):

Citizenship	People with a learning disability are individuals first and foremost and each has a right to be treated as an equal citizen.
Social Inclusion	People with a learning disability are valued citizens and must be enabled to use mainstream services and be fully included in the life of the community.
Empowerment	People with a learning disability must be enabled to actively participate in decisions affecting their lives.
Working Together	Conditions must be created where people with a learning disability, families and organisations work well together in order to meet the needs and aspirations of people with a learning disability.
Individual Support	People with a learning disability will be supported in ways that take account of their individual needs and help them to be as independent as possible

ANNEX E
