## Rounding of figures

In tables where figures have been rounded to the nearest final digit, there may be an apparent slight discrepancy between the sum of the constituent items and the total shown.

It is assumed in this report that there are 52.14 weeks in the year

The following symbols have been used throughout.

.. = not available/insufficient number of cases in sample

- = negligible (greater than zero but less than 0.5)

0 = nil

The following conversion factors may be of use:

1 Mile = 1.609 Kilometres

1 Kilometre = 0.6214 Miles

# 1 Introduction

The Travel Survey for Northern Ireland is based on the National Travel Survey as used in Great Britain. It is the only source of information on how, over Northern Ireland as a whole, people as individuals or family groups use different forms of transport to meet their travel needs. The Travel Survey for Northern Ireland is available for viewing on:

[http://www.roadsni.gov.uk/index/publications/publications-specific\\_interest\\_publications/publications-specific-travel\\_survey.htm](http://www.roadsni.gov.uk/index/publications/publications-specific_interest_publications/publications-specific-travel_survey.htm)

The main survey in Northern Ireland began as a continuous survey in March 1999 and has been running since then on a monthly basis. The TSNi surveys around 145 addresses each month. The number of useable households (includes either fully co-operating or partially co-operating households) averaged 83 per month during the time period 2005-2007.

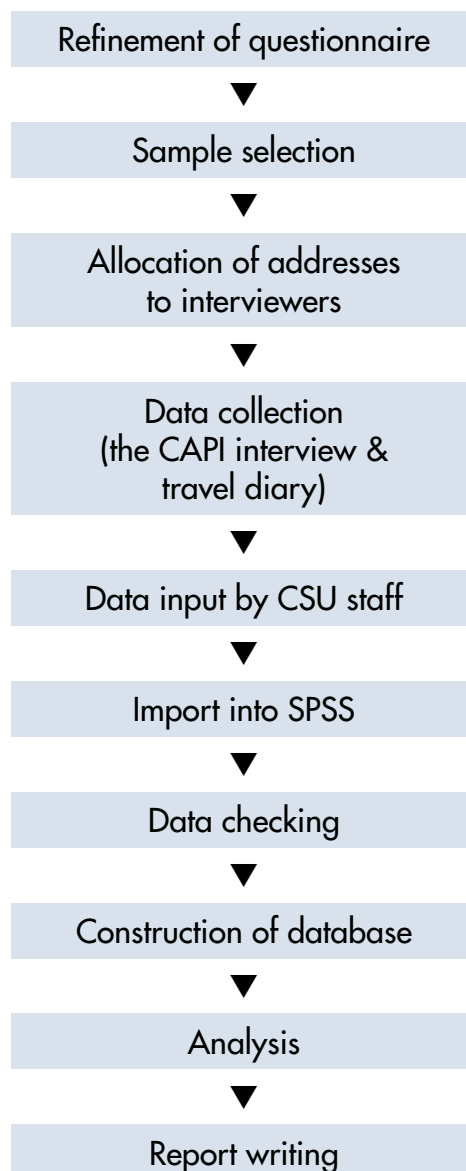

This Technical Report explains the methodology used to carry out the Travel Survey for Northern Ireland from January 2005–December 2007.

## 2 Sequence of work on the Travel Survey for Northern Ireland (TSNI)

The sequence of tasks carried out in the travel survey are summarised below. The survey collects information using two methods: a Computer Aided Personal Interview (CAPI - reproduced in Appendix A) and a seven-day travel diary (copies are available from the Northern Ireland Statistics & Research Agency, McAuley House, 2-14 Castle Street, Belfast, BT1 1SY).

Details of the individual procedures are set out in the remainder of this report.

**Figure 2.1** Sequence of the TSNI

## 2.1 Sample selection

The Travel Survey for Northern Ireland is required to provide a comprehensive picture of personal travel behaviour by people living in private households in Northern Ireland. The sample is therefore designed to provide a representative sample of households in Northern Ireland. Each member of each household is asked to provide information about journeys made in a pre-selected seven-day period, known as the Travel Week. As travel behaviour varies considerably depending on the month of the year or the day of the week, interviewing and travel record keeping is spread out evenly over the year.

The sample for the Travel Survey consists of a systematic random sample of addresses selected from the Land & Property Services (LPS) list of private addresses. This is the most up-to-date listing of private households and is made available to the Northern Ireland Statistics and Research Agency for research purposes. People living in institutions (though not in private households in such institutions) are excluded. A total of 145 addresses were selected for interview each month for the Travel Survey.

The Land & Property Services provides a good sampling frame of addresses, but contains no information about the number of households living at an address. Further selection stages are therefore required to decide which household to interview.

Interviewers are instructed to call at each address issued in their assignments. If an interviewer comes across an address, which contains more than one household, then a decision must be made as to which household to select to take part in the interview. The interviewer then numbers each individual household and uses Table 2.1 to determine which one of the households to interview:

**Table 2.1 Household selection table**

Number of households	2	3	4	5	6	7
Household selected	1	3	2	2	6	4

## 2.2 Allocation of addresses to interviewers

Every month each interviewer is allocated around 8 households to survey. Each address has been given a random start date for the travel week to ensure that travel start days are spread evenly across days of the week and weeks of the year. This also avoids any bias that may occur if respondents are allowed to pick their own travel week.

## 2.3 The interview

The information for the survey is collected in the following stages:

- The placement call
- The reminder call (if necessary)
- The mid-week checking call (if necessary)
- The pick-up call

**Figure 2.2 Possible calls made by an interviewer to household**

Before the interviewer's first call, the respondent receives an advance letter explaining the purpose of the study and that an interviewer will call.

The initial interview with the household is termed the **placement call**. At this call the interviewer explains the purpose of the survey, ideally to the entire household, and gains the co-operation of each household member. The interviewer then asks the Household Reference Person or other responsible person questions about the household composition and some general background information. Figure 2.3 shows the contents of the placement questionnaire.

The interviewer then asks the other individuals of the household a set of questions with a reduced set for children under 16. Questions are also asked about each household vehicle from the person best able to give that information (usually the main driver). After each individual interview the interviewer gives each respondent a **travel diary** and explains that the main aim of the diary is to collect information about travel habits over a seven-day period. Interviewers explain in detail how to record journeys made during their allocated travel week on the diary and talk the informants through some examples, explaining what to include and what not to include. They also describe the survey definitions, for example, usual place of work, in course of work, etc. Pocket size diaries are occasionally handed out to help respondents record details of their journeys. The interviewer also leaves a leaflet explaining the purpose of the survey with each household. In addition, a TSNI pen is left for each household.

The interviewer may make a **reminder call** (usually by telephone) to the household to remind them that the travel week is due to begin.

Sometimes the interviewer also makes an additional **mid-week checking call** on a household, part way through the travel week to help with problems and encourage accurate record keeping. This call is made at the interviewer's discretion, for example if the respondents are elderly or the household is particularly large and the interviewer was unable to get all members of the household together to explain the purpose of the study.

The interviewer returns to the household within six days after the end of the travel week to make the **pick-up call**. The interviewer collects the travel diary of each household member and checks the contents with the respondent. The interviewer also asks some additional questions to check whether the respondent has obtained a driving licence or any special tickets since the placement interview.

Has respondent obtained special tickets since placement?

## 3 Fieldwork control

Interviewers working on the survey use a “dial up” system to send their computer work to the office every week with details of interviews carried out that week. Diaries are also returned to the office by post after each pick up call.

The “dial up” system has been put in place to enable interviewers to use a modem to connect their computer to their telephone line, in order to send their weekly data in to the server and also to receive their next allocation.

A member of staff in Central Survey Unit paper codes the travel diaries and then, to ensure consistency, a different staff member checks the coding and transfers the information from the diary to the computerised Journey Input System.

The office supervisor makes further checks on 10% of diary coding and inputting to the Journey Input System. Every month, the office supervisor sends out a short questionnaire to some of the households that have been visited, to check the respondent’s level of satisfaction with the way the survey was carried out.

### 3.1 The Journey input system

The information from the travel diary is input into the Journey Input System using ‘Blaise’ software for Computer Assisted Interviewing. Hard and soft data checks are written into the journey input system. Quality checks are also made in order to monitor the progress of the interviewers work and ensure diaries are being filled in correctly.

The data is then merged with the information from the CAPI interview and converted into ASCII format. The data is imported into SPSS data files. Further quality checks are then made on the data in the SPSS files.

## 4 Response

Households may be classified into the following levels of response:

A fully complete response has a fully completed computer interview i.e. every individual answering and the vehicle grid filled in for all cars. There is also a completed diary for every individual.

A Partial response is where an interview has not been completed for all people but there is a matching individual interview and diary for at least one person in the household.

Only information collected from households classified as fully complete or partial has been included in the calculations.

An Outright Refusal is when there is no chance of an interview during the field period.

A Circumstantial Refusal is if circumstances prevent the respondent from participating in the survey e.g. they are genuinely too busy.

An Office Refusal (or refusal to advance letter) applies when a refusal is received at the Northern Ireland Statistics & Research Agency, Central Survey Unit Headquarters from a recipient of an advance letter.

A Refusal after promise to co-operate applies if, for example, an interviewer successfully makes an appointment, then calls back later and finds that the respondent has changed their mind.

A Non-Contact is if any of the following apply: respondent would not answer door, respondent rarely there/unconfirmed second residence, shift-worker/works odd hours, respondent away all survey period/on holiday, interviewer could not find address or ran out of field time.

A Non-eligible code is for premises which are wholly or partially residential, but in which no one is living. It is applicable for buildings under construction or under conversion if there is no household currently living there. It also applies to holiday accommodation and second residences. Derelict/demolished buildings are also included as are non-residential properties, Institutions and Halls of residences. This code should also be used if there is no trace of the address, or if the household is no longer resident at the address.

Tables 4.1 – 4.4 show the response rates received for data.

## 5 Data analysis

Data analysis is carried out using SPSS and Lotus and Excel Spreadsheets. Tables have been compiled so that the Travel Survey for Northern Ireland data can be easily compared to the Great Britain data.

## 6 Sampling errors

Estimates of population values (e.g. means or proportions) made from a random sample survey are dependent upon the particular sample chosen – a different sample selected will produce different estimates of the population figures. The estimates deviate from the true population values by varying amounts; these deviations are known as the sampling error and are, in theory, randomly distributed. The likely size of the sampling error or precision is measured by calculating the standard error of the estimate. This precision can also be expressed in terms of a confidence range about the sample estimate. A 95 per cent confidence range is the range of values contained within 1.96 standard errors of the survey estimate. If the survey were repeated many times under the same circumstances we would expect such a confidence range to contain the true value 95 per cent of the time.

For example, the number of journeys per person per year is estimated for 2004–2006 as 937 with a confidence range of 14. Hence the 95% confidence range for the number of journeys is 923 to 951.

Survey estimates are usable only if the standard errors are small, or put another way, that the estimates have the necessary precision for the particular purposes to which they are put. The size of a standard error depends upon three factors: the size of the sample; the survey design; and the variability in the population of the attribute being measured.

(Read out to the Household Reference Person or his/her spouse)

## hintro

### HOUSEHOLD INTRODUCTION

I am first going to ask a few questions about the people who live here and some details about your accommodation.

### PRESS 1 TO CONTINUE

The information in the Household Section should be obtained from the Household Reference Person or his/her spouse.

(Ask to the Household Reference Person or his/her spouse)

## Numbers

INTERVIEWER: YOU ARE GOING TO ASK ABOUT ALL THE PEOPLE IN THE HOUSEHOLD. START WITH THE HRP, THEN LIST ALL OTHER PEOPLE

(ADULTS AND CHILDREN) IN DESCENDING ORDER (YOUNGEST LAST) OF AGE WITHIN HOUSEHOLD

How many people are there in your household, that is, people whose main residence this is and who share at least one meal a day, or share living accommodation with you?

1..10

(Ask always)

## Name

PLEASE ENTER FIRST NAME OF THIS PERSON. IF TWO PEOPLE HAVE THE SAME NAME: ADD, FOR EXAMPLE, JNR OR SNR AFTER THE FIRST NAME, SO THAT YOU CAN DISTINGUISH THEM LATER

STRING[20]

(Ask always)

## Sex

PLEASE ENTER SEX OF ^Name

- (1) Male
- (2) Female

(Ask always)

## Age

What was your age/^Name's age on their last birthday?

ENTER CODE 99 IF BORN IN 1900 OR EARLIER.

CHECK WITH RESPONDENT AND ENTER AGREED AGE. IF AGE NOT KNOWN RECORD ESTIMATE OF AGE.

(Ask always)

## RelHRP

### ASK OR RECORD

I would now like to ask how all the people in your household are related to each other. Code relationship of each member to the others. Treat relatives of Civil Partners as though the Civil Partners were married. Also, treat cohabiting members of the household as though the cohabiting couple were married, unless the couple are a same sex couple but not in a Civil Partnership.:

- (1) Household Reference Person
- (2) Spouse
- (3) Cohabiting partner
- (4) Son/daughter (incl. adopted)
- (5) Step-son/daughter
- (6) Foster child
- (7) Son-in-law/Daughter-in-law
- (8) Parent/guardian
- (9) Step-parent
- (10) Foster Parent
- (11) Parent-in-law
- (12) Brother/sister (incl. adopted)
- (13) Step-brother/sister
- (14) Foster brother/sister
- (15) Brother/sister-in-law
- (16) Grand-child
- (17) Grand-parent
- (18) Other relative
- (19) Other non-relative
- (20) Civil Partner

(Ask if age > 15 from 2000 on)

## MarStt

Are you/is ^Name currently...

RUNNING PROMPT - CODE FIRST THAT APPLIES:

- (1) Single, that is never married
- (2) Married and living with husband\wife
- (3) A civil partner in a legally-recognised Civil Partnership
- (4) Married and separated from husband\wife
- (5) Divorced
- (6) Or widowed?
- (7) Spontaneous only - In a legally-recognised Civil Partnership and separated from his/her civil partner
- (8) Spontaneous only - Formerly a civil partner, the Civil Partnership now legally dissolved
- (9) Spontaneous only - A surviving civil partner: his/her partner having since died

## MarChk

### ASK OR RECORD

Is ^Name's husband/wife/civil partner a member of the household?:

- (1) yes
- (2) no

**Ethnic****SHOWCARD L**

To which of these ethnic groups does ^Name consider they belong?

This is a question of respondent's (or proxy's) opinion:

- (1) White
- (2) Chinese
- (3) Irish Traveller
- (4) Indian
- (5) Pakistani
- (6) Bangladeshi
- (7) Other Asian
- (8) Black - Caribbean
- (9) Black - African
- (10) Other Black
- (11) Mixed ethnic group
- (12) None of these

**LivTog****ASK OR RECORD**

May I just check, are you currently living with someone in this household as a couple?:

- (1) yes
- (2) no
- (3) Spontaneous only - Same sex couple (but not in a formal registered Civil Partnership)

*(Ask if marstt <> married and living with husband/wife AND age > 15)*

**Joint**

Does ^Name/you jointly own or rent this accommodation?

- (1) Do not own or rent
- (2) Sole owner/renter
- (3) Joint owner/renter

*(Ask to the Household Reference Person or his/her spouse)*

**ResLen**

Now I would like to ask a little bit about circumstances which may affect the traveling people do.

First, how many years has HRP lived at this address?

- (1) Under 1 year
- (2) 1 but under 2 years
- (3) 2 but under 3 years
- (4) 3 but under 5 years
- (5) 5 but under 10 years
- (6) 10 years or more
- (7) Always lived here

*(Ask to the Household Reference Person or his/her spouse if ResLen = under 1 year)*

**OldAdd**

Is HRP's old address more than 1 mile from here or less than that?

- (1) More than one mile
- (2) One mile or less

*(Ask to the Household Reference Person or his/her spouse)*

**Tenure**

Does your household own or rent this (HOUSE/FLAT/ROOM)?

- (1) Owns/is buying
- (2) Rents
- (3) Rent free

*(Ask to the Household Reference Person or his/her spouse if Tenure = rents OR rent free)*

**Whorent**

Do you rent it from the council, or from a private landlord or housing association?

- (1) Council/new town corporation
- (2) Private landlord/housing association

*(Ask to the Household Reference Person or his/her spouse if (Tenure = rents OR rents free) AND (whorent = private landlord/housing association))*

**Furnish**

Is this (HOUSE/FLAT/ROOM) rented (provided) furnished or unfurnished?

- (1) Furnished
- (2) Unfurnished or partly furnished

*(Ask to the Household Reference Person or his/her spouse)*
